## CARTRIDGE DESIGNATION

Our present system of cartridge designation is a carry-over from the confusion of nomenclature dating back to the 1850's---together with foreign terms, as European arms came into greater use in this country.

Many early black powder cartridges were designated by caliber in inches, black powder charge in grains and weight of the bullet in grains. An example is the 45-70-500 (forty-five hundredths inches, 70 grains of black powder, and 500 grain lead bullet. The 30-30 was introduced about the time smokeless powder was coming into use. The last 30 in the designation indicates 30 grains of smokeless powder, although the cartridge was also loaded with black powder.

Here are some other cartridges and their meanings: The 30-'06 was named for the caliber and the year of it's adoption (1906) With the 250-3000, as originally introduced by Savage, the 250 represents the bore diameter in thousandths of an inch and the 3000 the muzzle velocity of the 87 grain bullet in feet per second. The British ordinarily indicate the caliber in thous-

sandths of an inch, such as the .303. European cartridges are calibrated in millimeters as 7x57R (7 millimeter caliber, 57 millimeter case length, and R for a rimmed cartridge case.....

## Celebrations.

Emp. 12/24/1927/15 Louis Lund tells of his first Xmas in Juneau---He came to town in 1889. Xmas celebrated in S.O.Wheelock's Dance Hall, (where Cowling Motor Co. now stands) The place was too crowded even for a fight to take place. Wheelock made \$1100. clear that night. Geo Miller, who later owned the Circle City Hotel, made over \$400. in his restaurant, which was next door.

There were only two white girls in the crowd--one known as Georgia the French girl and the other was Esther Duffy----rest were all natives. After each dance it was customary to go to the bar for a drink and the indian girls were given an apple which they appreciated as greatly as the white girls did nuggets...

There were 33 saloons in town then---the most prominent being the New Zealand (in the Brady Bldg.----Harris Paint shop now stands) on 2nd St. (Vans Injector shop) and was connected by an alley to the Occidental Hotel. The Opera House on the corner of 2nd and Seward; The Missouri later called the Louvre, on Front St. and which until just before 1927, housed the Boston Store. The Montana Saloon

next to the Juneau Billiards Bldg. (Percy's Cafe) and French Pete had his scow on the beach (back of Home Gro. now.)

Louis Lund says Young Bros had a store in the same spot as Juneau Young Co. now; Sitka Trading Co. had a general store where Thomas Hdw Co. stands now, and the Decker Bros had their store next to present (Miner Pub. Co. 1955) and Kohler & James had their store where the Goldstein Bldg. is.

A woman in charge of the air-raid alarm saw the lights go out, so thinking the Japs were coming she sounded the air-raid alarm. Shortly after, the night-watchman heard the air-raid alarm and figured the alert was over so turned all the lights back on---and, ~~all the while this~~ all this was going on the house for which the original alarm had been turned in, burned to the ground.
