356 photographs

Processed by: Staff

ACQUISITION: The prints in this collection were made from Alaska Railroad Office files, in Anchorage, Alaska, in 1977. The original photographs were given to the Anchorage Museum of History and Art (Acc. No. 1979-014).

ACCESS: The collection is unrestricted.

COPYRIGHT: Request for permission to publish or reproduce the photographs should be discussed with the Librarian.

PROCESSING: Copy prints were made from the borrowed prints and sleeved in Mylar. An item-level inventory is available.

Historical Note

The Alaska Railroad began as the Alaska Engineering Commission (AEC), which was created by President Woodrow Wilson in the Alaska Railroad Act (38 Stat. 305), March 12, 1914, to supervise construction of Alaska's railways. When railroad construction was completed and the railroad began operating in 1923, the AEC became the Alaska Railroad Commission, later redesignated The Alaska Railroad.

Scope and Contents Note

Most of the photographs were taken by Alaskan Engineering Commission photographers, professional photographers hired to record railroad construction. In addition to construction, people, camps, buildings, and communities along the railroad are shown. The collection includes a series of agricultural photographs, from the Matanuska Valley and Fairbanks, among others. Images of government officials are also identified. Photographers represented in the collection include P.S. Hunt, H.G. Kaiser, Albert J. Johnson and several views by the Sydney Laurence Co. Most images have AEC numbers.

Other Alaska Railroad collections include PCA 246 (microfiche), PCA 198 (lantern slides) and the Alaskan Engineering Commission collection, PCA 131.
