United States Forest Service Photograph Collection, 1915-1976

PCA 207

380 photographs, 42 slides

Processed by: Staff

**ACQUISITION:** The collection was created from original U.S. Forest Service photographs that Jim Kaplan loaned to the Library for copying, ca. 1982.

**ACCESS:** The collection is available for viewing, however, the photographs may not be photocopied.

**COPYRIGHT:** Request for permission to publish or reproduce material from the collection should be discussed with the Librarian.

**PROCESSING:** Images are numbers and sleeved in Mylar. The collection is arranged, generally, by photographer. An item-level inventory was created. Some of the citations supplied by the U.S. Forest Service also contain historical information.

## Scope and Content

This collection of slides and photographs includes views and groups of views arranged under the photographer's name and shows particular forest/area locations at specified times. Images include forestry activity, logging, pulp mills, fox farming, Healy coal fields, villages, national forests and other Alaskan subjects and landscapes. Thirty-eight photographers (USFS personnel) are included; others images were taken by unidentified photographers.
