INTRODUCTION

Overview

The Commercial Fisheries Entry Commission (CFEC) is an exempt, independent, quasi-judicial agency responsible for promoting the conservation and sustained yield management of Alaska's fisheries resources and the economic health and stability of commercial fishing in Alaska by regulating entry into commercial fisheries.

To meet these responsibilities, the Commission is organized into four sections (Adjudications, Research, Licensing, and Data Processing; see, chart: "Organization by Agency Function") and engages in the following activities mandated by law (AS 16.43):

- Establishes maximum numbers of entry permits for fisheries to be limited and ranks eligible applicants according to the relative hardship they would suffer by not receiving an entry permit from the state for a limited fishery;
- Evaluates entry permit applications and adjudicates claims not resolved in initial classification;
- Issues entry permits in limited fisheries, interim-use permits in unlimited fisheries, and licenses for all vessels as required to legally participate in the state's commercial fisheries;
- Reviews requests for emergency and permanent transfers of entry and interim-use permits, and compiles data on all such transfers;
- Enforces provisions of the Limited Entry Act by regulating permit transfer activities, conducting investigations, and initiating administrative enforcement proceedings;
- Monitors unlimited fisheries to assess the rate of development and the potential need for limitation;
- Monitors limited fisheries to obtain information needed for setting optimum numbers in those fisheries and to determine the need for fleet reduction or increase;
- Participates in the research and development of comprehensive fisheries economic data, which is made available to policy makers and members of the public; and,
- Works with other state and federal management agencies to develop and coordinate fisheries policies.

A brief outline of some of the major court decisions, Commission activities, and other events affecting the operation of the Commission during the past several fiscal years can be seen in the summary table which follows this introduction.

In 1992, the Commission and its staff continued to meet its responsibilities despite the declining budget, which forced employee layoffs and position cuts, and voluntary leave-without-pay contributed by existing employees.

Hearing officers in the Adjudications Section completed 205 administrative hearings this year, and issued 172 decisions, which is an all-time high for one year. Also, CFEC Commissioners adjudicated a total of 115 cases during 1992. In addition to conducting hearings and issuing decisions on appeals of emergency transfer requests, Commission paralegals classified applications for limited permits in the Togiak herring spawn on kelp fishery and interim-use permits in the Southeastern Dungeness crab fishery.

The Licensing Section again issued more than 50,000 permits and licenses and collected more than \$6 million in revenue to the state. Additionally, the licensing staff processed 1,860 requests for transfers of permits, and responded to an ever increasing number of information requests from the public regarding a variety of fisheries licensing questions.

The Research Section continued many projects including analyses of fisheries issues, monitoring trends in Alaska's fisheries, providing data needed by other agencies and the public, evaluating the need for access controls in particular fisheries, and developing an optimum number recommendation in the Southeastern Alaska roe herring purse seine fishery. Research also completed analyses and reports requested by the Legislature, the Office of the Governor, and the Alaska Department of Fish and Game (ADF&G).

The Data Processing Section continued to improve upon the computer support that allows the Commission to perform its functions efficiently. Commission programmers have networked new computer resources which will help contain costs and provide needed computing capacity in the face of reduced allocations. Additionally, the Data Processing Section provides important information to the public and to other government agencies in the form of both automated and special request programming jobs.

The following parts of this report provide a more thorough outline of some of the year's important events by operating section. The appendix provides summary data on Alaska's limited fisheries and permits. Questions or comments about the contents of this report are welcome.

Organization by Agency Function

ADJUDICATIONS

- Application Processing & Classification
- Administrative Hearings
- Case Management
- Preparation of Official Record in Judicial Appeals
- Residency / Fraud Investigations

LICENSING

- Entry and Interim-Use Permit Renewal
- Vessel Licensing
- Permit Transfers
- Local Licensing (Bristol Bay)

RESEARCH

- Fisheries Data Collection
- Economic Profiles
- New Limitation Research
- Priority Hardship ("point") System Development and Testing
- Optimum Number Research

DATA PROCESSING

- On-Line Licensing Data Bank
- Fisheries Data Bank
- Data Assistance to Adjudications and Research
- Personnel, Travel, Accounting, and Property/Supply Management

***NOTE:** The above organization chart presents a general view of the Commission's primary functions. It by no means lists all activities undertaken to meet the Commission's statutory responsibilities as set forth in AS 16.43.

Major Decisions/Activities Affecting Agency Operations (Fiscal Years 1993 - 1988)

FY93:

- Completed optimum number study for the Southeastern Alaska roe herring purse seine fishery.
- Proposed optimum number regulation pursuant to the study.

- Worked with Department of Law to develop regulations to implement SB 449 and establish procedures to govern the forced transfer of limited entry permits by the IRS and child support claimants.
- Conducted workshops related to getting and keeping limited entry permits in local communities.
- Commissioners and hearing officers each completed more than 100 adjudicatory decisions. Among the nearly 1,000 decisions issued since 1983, only one has been reversed by the Alaska Supreme Court.
- Conducted many research projects in response to requests from the Commission and others (for example, limited entry studies, Alaska Board of Fisheries, ADF&G, Governor's Office, fishing associations and Legislators).

FY92:

- Conducted workshops to aid rural Alaskans get and keep limited entry permits in their local communities.
- Completed initial classification of Western Alaska herring and Togiak herring spawn on kelp fisheries applications.
- Developed and successfully worked for passage of Governor's SB 449 to govern forced transfers of entry permits following the court decisions in Lorentzen and Anderson.
- Continued an optimum number study for the Southeastern Alaska roe herring purse seine fishery.
- Conducted research, held public hearings, adopted regulations and implemented a moratorium (in response to HB 137 from the previous year) in the Southeastern Alaska Dungeness crab fishery (more than 300 eligible to apply).
- Aided the Alaska Board of Fisheries in its creation of a new open access salmon set net fishery around Atka Island for the 1992 season, which will commercially harvest local pink salmon stocks.
- Federal District Court ruled in the Lorentzen case that the IRS could place federal tax liens upon limited entry permits.

FY91:

- Togiak herring spawn on kelp fishery point system adopted, application period began, approximately 500 applications were received. Initial classification of approximately half of the 1,813 Western Alaska herring permit applications completed.
- In the Lorentzen case, a permit holder, joined by the State as a friend of the court, obtained a preliminary injunction from the Federal District Court against the IRS which blocked the IRS' scheduled sale of the holder's entry permit.

FY90:

- Exxon Valdez oil spill continued to make demands on Data Processing; and Research sections for services required to respond to legal activity.
- Western Alaska herring fisheries point systems finalized, and almost 1,100 applications received.
- LI>Togiak herring spawn on kelp fishery researched, hearings held, and fishery limited.

FY89:

- Research and hearings on Western Alaska herring fisheries point systems.
- Wassillie settlement finalized, processing of 273 applications began.
- Alaska Supreme Court decision in Johns case; extensive research and data analysis for optimum number determinations began.
- Exxon Valdez oil spill in Prince William Sound created significant demand for Data Processing services to assist affected fishermen.

FY88:

- Research and hearings on Prince William Sound herring spawn on kelp pound fishery point system and processing of 140 applications began.
- Processing of 213 applications for the Southeastern black cod fisheries began.
- Western Alaska herring fisheries researched, extensive hearings in Western Alaska villages held, and five

fisheries limited.

ADJUDICATIONS

Overview

The Adjudications Section at the Commission is responsible for processing applications for entry permits in limited fisheries and conducting hearings for those who contest Commission decisions affecting them. The section also conducts investigations into potential violations of the Commission's statutes and regulations, and provides assistance to other enforcement agencies.

Entry permit applications are first evaluated by Commission paralegals who classify applicants in a ranking system that measures each applicant's past participation and economic dependence on the fishery. Applicants who disagree with their initial classifications may request hearings. Hearings are also available to contest initial decisions about permit transfer requests or about qualifications for reduced permit renewal fees.

Commission hearing officers conduct administrative hearings throughout the state and decide appeals of initial determinations about entry permit applications, permit transfer requests, and fee arrearages charged to those who wrongly claimed to be Alaska residents. The Commissioners review and affirm or modify hearing officers' decisions on their own motion, or upon the request of an affected party. If no review is ordered by the Commissioners, hearing officer decisions become final in 60 days.

Commission hearing officers also preside in "show cause" hearings. These hearings are held in the presence of the Commissioners. In these proceedings, the Commission may impose fines, or revoke or suspend the permits of those who attempt to mislead the Commission with false information.

Administrative Proceedings and Decisions

During 1992, Commission paralegals continued to conduct hearings and decide appeals of denied emergency transfer requests.

During 1992, Commission paralegals completed most of the initial classification of applications for Togiak herring spawn on kelp permits, and processed applications for interim-use permits in the first year of the moratorium on new entrants into the Southeastern Dungeness crab fishery.

The hearing officers conducted 205 hearings in 1992: 157 on permit applications, 25 on permit transfers, and 23 miscellaneous actions. The hearing officers issued 172 decisions: 108 on permit applications, 40 on permit transfers, 2 on fee arrearages, 21 miscellaneous actions, and 1 on a show cause proceeding. At the end of the year, 636 cases were in various stages leading up to the issuance of a decision by a hearing officer.

The Commissioners adjudicated a total of 115 cases during 1992: 68 permit applications, 41 permit transfers, 4 show cause actions, and 2 on miscellaneous matters. At the end of the year, 187 cases were in various stages of the adjudication process leading to the issuance of final decisions by the Commissioners.

Investigations

During 1992, the Commission received fines and arrearages of \$34,514 due to the successful settlement of prior actions. The Commission continues to cooperate with state and federal law enforcement agencies.

Judicial Rulings and Appeals

The Alaska Supreme Court issued an important decision in 1992 about the Commission and entry permits. In CFEC, State v. Russo, 833 P.2d 7 (Alaska 1992), the court upheld the CFEC's definition of the "unavoidable circumstances" provision, and held that earlier decisions allowing the partners of gear license holders to claim points for income dependence did not extend so far as to let these unlicensed partners receive points for fishing as gear license holders.

Internal Revenue Service Seizures of Limited Entry Permits

For the past ten years, the Internal Revenue Service (IRS) has attempted to seize and force the sale of Alaska limited entry permits. The Entry Commission has approached the issue in two ways. The Commission has done everything in its power to fulfill the purposes of the Alaska Limited Entry Act (which exempted limited entry permits from the claims of all creditors), including initiating one federal court action and defending another. Additionally, the Commission has sought to cooperate with the IRS to facilitate voluntary compliance by fishermen in order to avoid federal seizure of Alaska limited entry permits. From the beginning, the Commission has consistently warned fishermen that they must pay their taxes.

In March of 1992, the Federal District Court's decision in the Lorentzen case held that Alaska limited entry permits are subject to IRS tax liens. The net effect of this decision is that (in addition to child support claimants with judgments for arrearage) the Internal Revenue Service is authorized to enforce its liens against Alaska limited entry permits. Otherwise, the decision does not change state law: Alaska limited entry permits remain generally exempt from the claims of creditors and may not be pledged as security for debts with the exception of loans from the state commercial fisheries loan program and the Alaska Commercial Fishing and Agriculture Bank (CFAB).

In response to the Lorentzen and the earlier Anderson decisions, the Alaska Legislature unanimously adopted Governor Walter J. Hickel's SB 449 (Chapter 55, SLA 1992) to govern the two authorized forms of involuntary transfer. The new legislation authorizes such transfers and requires them to conform to applicable state law and, among other things, protects the revolving loan funds of the state loan program and CFAB. The Commission and the Department of Law have since been developing regulations to implement the new legislation.

At the same time, the Commission engaged in a dialogue with the IRS to address, among other things, the problem of informing a prospective transferee of an entry permit of the possible existence of a federal tax lien. Beginning in June, the Commission sent letters to parties to all transfers warning them that federal tax liens do apply to entry permits. The IRS refuses to provide the Commission actual notice of its liens, but, the IRS agreed to inform parties to transfers of federal tax liens filed in Alaska. However, the problem of identifying all federal tax liens against former holders of an entry permit-- particularly those who resided outside of Alaska--remains unresolved.

In late August, the IRS advertised that in October of 1992 it would conduct a public auction of 20 seized Alaska limited entry permits. By the time of the sale, only five permits remained on the auction block. Uncertainty surrounded the sale, because the IRS warned all potential buyers that the holder of an entry permit could redeem the permit up until the time of final transfer by the Entry Commission. Therefore, no successful bidder could be assured of actually receiving the permit. In turn, the Entry Commission notified all potential buyers of the newly enacted state legislation. Subsequent to the auction, the IRS requested transfer of only three of the permits sold at auction. The Entry Commission continued to develop regulations to implement Chapter 55, SLA 1992. The regulations must be effective for the Entry Commission to have authority to process the requests. The Entry Commission anticipates that regulations will be in effect prior to the 1993 salmon season.

Near the end of 1992, together with CFAB, the Entry Commission entered a formal working group with the Chief of Collections for the IRS in Alaska. The group will share public information in the hope of facilitating voluntary compliance by fishermen with tax obligations, acquainting the IRS with some of the unusual factors affecting fishermen in Alaska, and encouraging restraint in the seizure of entry permits by the IRS. In order to better define the problem, the IRS promised the Commission information as to the distribution of entry permit holders with outstanding tax obligations. Additionally, the Entry Commission is consulting with interested Alaska legislators and others for the

purpose of analyzing the problem and reviewing proposed solutions.

LICENSING

Overview

The Entry Commission's Licensing Section plays a vital role in Alaska's commercial fishing industry as it issues all of the permits and vessel licenses required for individuals and vessels to fish commercially in the state on an annual basis. The licensing workload fluctuates with the seasonal nature of the fisheries, with the majority of the 50,000 licenses issued between November and June. In addition to permit and vessel license issuance, the section reviews and makes determinations of approval or denial of all requests for permanent and emergency (temporary) transfers of entry permits.

The small licensing staff has been able to cope with the increasing demands of the workload only through extensive reliance upon automated equipment and a customized database system developed and maintained by the Commission's data processing staff. In the past few years, despite the highly efficient licensing system, staff resources have been strained by the growing number of telephone calls to which the section must respond, and the increasing complexity of the subject matter. Licensing staff must be aware of statutory, regulatory and programmatic changes in fisheries throughout the state, as well as developments in federally managed fisheries (such as the potential implementation of a federal moratorium or IFQ program). As confusion among fishermen escalates in regards to the legal requirements with which they must deal, so does the amount of time the licensing staff spends responding to inquiries. This has a definite impact on "turnaround time" for processing license applications and transfer requests as there are days when the staff has almost no time to work on applications received in the mail because of the number of incoming phone calls.

The new format for permit and vessel license renewal forms developed in-house, which was first used for the 1992 season, has been very successful in improving efficiency. Combining several licenses on a single form significantly reduced the amount of paper handling, speeding the data entry and embossing processes and decreasing the amount of filing. It also simplified the renewal process for the fishermen and many favorable comments have been received. In addition, the new format provides more flexibility in dealing with late-breaking developments that affect licensing, since the Commission is no longer subject to the time constraints of outside vendors.

During 1992, permit transfer activity increased slightly over the 1991 level, with a total of 1,860 requests received. This included 1,005 requests for permanent transfer, of which 55 were denied and 950 approved, and 855 requests for emergency transfer, of which 30 were denied and 825 approved. The accompanying graph clearly demonstrates the seasonal nature of the transfer workload. During the five months from March through July, the transfer staff reviewed 73% of the total transfer requests received during 1992. During the peak of the transfer season, it has been necessary for 2-3 licensing staff to divert their efforts from their regular duties to transfers in order to maintain an acceptable level of service. The transfer process has become more involved over time due to the increasing complexity of related issues such as Internal Revenue Service (IRS) and Child Support Enforcement lien problems, more permits held by estates, etc., with the result that the workload is definitely more than one person can possibly handle. During 1993, it is anticipated that one or two positions will be reclassified to work primarily with transfers, at least on a seasonal basis. Providing more extensive cross-training will enable us to utilize limited staff resources more effectively in responding to shifts in distribution of the workload.

The Commission was able to continue the licensing field office operations in Bristol Bay during 1992, although there were cutbacks in the number of days of service provided. The full-time licensing office in Kodiak was closed due to budgetary reductions when the licensing clerk position there became vacant in mid-July. More detail about licensing field office operations follows the breakdown of licenses issued during 1992.

The Commission's licensing section takes in a significant amount of revenue from annual permit and vessel license fees, one-time limited entry application fees, fines and arrearages assessed pursuant to residency investigations or revocation actions, and user fees charged for licensing services at field offices. According to Alaska Statute 23.35.060,

the Commission must transfer 60% of the "commercial fishing license" fee for each fisherman (this amounts to \$18 for each resident and \$54 for each nonresident) to the Fishermen's Fund program administered by the Department of Labor. A breakdown of revenues received during both fiscal and calendar year 1992 appears in the following table.

1992 Licensing Revenue

REVENUE SOURCE *	FISCAL YEAR 92	CALENDAR YEAR 92
Permit Fees	\$ 5,678,255	\$ 5,821,370
Vessel License Fees	308,780	335,538
Limited Entry		
Application Fees	21,870	7,940
Field Office User Fees	41,160	32,820
Fines/Arrearages	81,571	34,514
NSF Check Penalties	1,150	825
Misc. Revenue	68,831	71,694
GROSS REVENUE	\$ 6,201,617	\$ 6,304,701
Refunds	-102,328	-104,462
NSF Checks	- 10,960	- 11,380
NET REVENUE	\$ 6,088,329	\$ 6,188,859
FISHERMAN FUND		
TRANSFER	\$ 467,136	\$ 467,046

* This report indicates total revenue received during the specified time period from each source, regardless of the license year; it may include fees for permits and vessel licenses for 1991, 1992 and 1993.

Licenses Issued For 1992

Limited Entry Permits Not Renewed.	491
Limited Entry Permits Revoked or Lapsed (since 1975)	537
Limited Entry Permits Renewed.	12,929
Interim Permits in Fisheries under Limitation or Moratoria	1,132
Interim Permits in Open-to-Entry Fisheries	18,137
Special Harvest Area (Hatchery) Permits.	16
Educational Entry Permits.	5
PERMITS PAID FOR 1992	32,219
VESSELS LICENSED FOR 1992	17,194
TOTAL PERMITS AND VESSEL LICENSES	49,413
Alaska Resident Permit Holders.	13,479
Nonresident Permit Holders.	4,156
TOTAL PERMIT HOLDERS.	17,635

\$467,046 was transferred to the Fishermen's Fund from permit fees for

license year 1992.

Licensing Field Office

During 1992, the Commission found it necessary to make some reductions in services provided at licensing field offices. The Kodiak licensing office which had been operated on a full-time basis since 1983 (with the position jointly funded by the ADF&G and CFEC since 1987) was permanently closed on July 16, 1992. The office closure was the result of budget reductions which impacted both ADF&G and CFEC causing the licensing clerk position to become vacant, at which time the Commission could no longer justify expending limited resources to maintain an office which was not fully utilized.

The following chart indicates usage of field office services during 1992. The user fee is a surcharge of \$10.00 for each permit or vessel license obtained at a field office.

Field Office Locations	Permits Issued*	Vessels Licensed
Kodiak	2,027	709
Dillingham	946	105
King Salmon	420	137
TOTAL FIELD OFFICE USER FEES		\$32,820

* Permits Issued includes original cards and duplicates.

In 1992, the Commission provided licensing and transfer service during the Bristol Bay salmon season, through the ADF&G offices in Dillingham and King Salmon, although the period of coverage was reduced significantly from prior years. Rather than providing staff in both Dillingham and King Salmon during most of the season, the Dillingham office was open for one week in early June, then the King Salmon office was operated for the next three weeks, as only one staff member at a time could be spared from the Juneau office. In addition, a licensing clerk was on duty in Dillingham for a few days prior to the herring season.

RESEARCH

Overview

The research section provides the background research and data analyses needed by the Commission. The section, coupled with the Commission's data processing section, also produce basic economic data on Alaska's fisheries which can be used to address many policy questions and to develop standard or specialized reports to serve the data needs of users outside the agency.

In 1992, the Commission's research staff was involved in many projects. These projects included efforts to monitor trends in Alaska's fisheries, to evaluate the need for access controls in particular fisheries, to provide other agencies and users with needed data, and to develop optimum number recommendations for the Southeastern Alaska roe herring purse seine fishery.

The staff also produced analyses on issues for the Legislature, the Office of the Governor, the ADF&G, and the Alaska Board of Fisheries. In addition, the staff answered numerous information and data requests from the general public. The following paragraphs provide brief highlights of 1992 activities.

Limitation Studies

Each year, as Alaska's unlimited fisheries face increasing fishing pressure, the Commission receives requests to limit entry into additional fisheries. When a petition is received, the Commission conducts research to determine if access limitation is needed and to evaluate whether or not the existing limited entry program would produce significant benefits.

The nature of the fleet and the applicable regulations are evaluated to determine the extent to which limiting the number of participants will serve to contain the growth in effort. Historical fishing patterns are analyzed and an effort is made to determine the best way to define the fisheries for limitation purposes to help prevent post-limitation effort increases.

In 1992, the Commission was again petitioned to limit the Cook Inlet crab fisheries. In response to the petitions, the research staff completed three reports on the Cook Inlet crab fisheries. These reports are The Cook Inlet Dungeness Crab Fishery (92-14N), The Cook Inlet Tanner Crab Fishery (92-15N), and The Cook Inlet King Crab Fishery (92-16N). All three reports were prepared by S. Shirley.

Another report, Prince William Sound Herring Spawn-on-Kelp Diving / Handpicked Fishery (92-9), was prepared by A. Tingley. This study was also conducted in response to a limitation petition. Analyses of other petitions occurred in 1992, but reports are not yet completed. CFEC non-confidential briefing reports are available upon request.

Optimum Number Research

In 1992, the Commission's research staff completed an optimum number study for the Southeastern Alaska roe herring purse seine fishery. The results of the analyses are contained in Southeastern Alaska Roe Herring Purse Seine Fishery - Optimum Number Report (92-2) prepared by K. Schelle, B. Muse, and K. Iverson. This work was mandated by the decision of the Alaska Supreme Court in *Johns v. State*, CFEC, 758 P.2d 1256 (Alaska 1988).

The Johns case orders the Commission to make an optimum number decision in the Southeastern Alaska roe herring purse seine fishery. Johns recognizes that more permits could be created and sold as a result. Because Johns is

premised on a constitutional issue, the same claim could be brought in any limited fishery where there has been a substantial change in conditions since the time the fishery was limited.

Based on the information and analyses in the study, the Commission has proposed an optimum number of 44 for the fishery. The public comment period for the proposal will run through June 1, 1993. Interested persons may submit comments to Sandy Samaniego, the Commission's Law Specialist.

Due to the size of the optimum number report, a \$10.00 fee is being charged per copy to help offset the cost of copying and mailing. Persons who want copies of the optimum number report should send their request with payment to Ms. Samaniego.

Permit Distribution Patterns

In 1992, the Commission continued to monitor changes in the distribution of holders of Alaska's limited entry permits. This is a topic which continues to be an important concern to Alaskans and their legislators. The report *Changes In The Distribution Of Alaska's Limited Entry Permits, 1975-1991* (CFEC Report 92-17), co-authored by R. Berning and E. Dinneford provides extensive data, information, and analyses on the topic.

This report updates previous studies by the Commission. For analysis purposes, the report defines five resident-types relative to each limited fishery. These include non-residents and four Alaskan resident-types. The four Alaskan resident-types are based upon whether a permit holder lives in a rural or urban community, and whether that community is considered local or non-local to the limited fishery.

The report provides data on the 48 limited fisheries for which permanent permits had been issued through year-end 1991. It covers the 1975 through 1991 time period and includes detailed information on the changes in the number and type of entry permits held by each Alaskan resident-type and non-residents.

The report provides fishery specific and statewide data on transfer incidence, the initial geographic distribution of permit holders, changes due to permit transfers, changes due to permit holder migrations, and the year-end 1991 geographic distribution of permit holders. Data are also provided on the age distribution of permit holders through time and age differences between transferors and transfer recipients.

Summary statistics are also reported from CFEC's transfer survey. These statistics provide information on the incidence of transfers between family members and business partners, transfer acquisition methods, and transfer financing methods. Copies of the report are available upon request.

Other Reports/Activities

During the year, the Commission's research staff produced many ad hoc reports for the Commission and small reports for the Alaska Board of Fisheries and Alaska's Legislature. The staff produced monthly permit value estimates for the Department of Commerce and Economic Development and other users. E. Dinneford produced a number of reports on wholesale production and value for both the Commission and outside users and produced reports for the Commission on changes in permit holdings in particular fisheries by village.

The Alaska Board of Fisheries frequently needs data or background reports on limited fisheries to help them analyze regulatory proposals. In 1992, CFEC's research staff prepared the following reports for the Alaska Board of Fisheries:

- Background Report on Limited Entry In the Peninsula / Aleutians Salmon Fisheries (92-3) prepared by S. Shirley.
- Background Report On Limited Entry In The Hand and Power Troll Fisheries (92-4) prepared by S. Shirley.
- Background Report On Limited Entry In the Arctic-Yukon-Kuskokwim Salmon Fisheries (92-5) prepared by S. Shirley.

- Earnings, Ex-Vessel Value and Residency for the Southeast Alaska Commercial Troll Fishery (92-6) prepared by S. Shirley and E. Dinneford.

Several analyses and reports were also prepared for ADF&G and/or the Office of the Governor. Two reports, Changes In Holdings of Permanent Limited Entry Permits In Metlakatla, Alaska 1975-1991 (92-12) and Bristol Bay Drift and Set Gill Net Harvest and Estimated Gross Earnings, By District and Residency, 1986-1991 were prepared by E. Dinneford at the request of ADF&G.

In December of 1991, the North Pacific Fishery Management Council (NPFMC) passed Individual Fishing Quota programs for the halibut and sablefish fisheries off of Alaska. Many Alaskans remained concerned about the potential impacts of these programs, and some proposed amendments to the Council's plan. The Office of the Governor and ADF&G asked for the Commission's help in analyzing three proposed amendments.

Preliminary results of these studies were contained in two discussion draft reports which were distributed by the NPFMC. The first report was titled Analysis of the "1,000 Pound Minimum IFQ" Proposed Amendment To The Individual Fishing Quota Management Alternative For Alaska's Fixed Gear Halibut Fishery. The second report was titled Analyses of "The Sitka Block Proposed Amendment" and "The Full/Partial Block Proposed Amendment" To The Individual Fishing Quota Management Alternative For Fixed Gear Sablefish and Halibut Fisheries - Gulf of Alaska And Bering Sea/Aleutian Islands. These analyses were prepared by K. Schelle, B. Muse, and K. Iverson.

Copies of these discussion draft reports can be obtained from the NPFMC. Based upon public comments, the NPFMC decided to modify the alternatives and to expand and develop the report into Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analyses. At the request of the State of Alaska, CFEC will again take the lead in the expanded analyses which will occur during 1993.

The research staff also provided some assistance on a report prepared by D. Ackley of the ADF&G on another regulatory issue before the NPFMC. The report was titled Draft Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analysis For Amendment 21B to the Fishery Management Plan for The Groundfish Fishery of the Bering Sea and Aleutian Islands: Chinook Salmon Bycatch Management In The BS/AI.

Alaska's Legislature also frequently asks the Commission for data or analysis of particular issues which they are considering. In 1992, the following analyses and reports were prepared at the request of Alaska's Legislature:

- Potential Impacts Of Allowing Older Hand Trollers To Convert Their Permits To Non-Transferable Power Troll Permits (92-1) by S. Shirley, K. Schelle, and E. Dinneford.
- The Feasibility Of Limited Entry and Permit Exchange For The Guided Sport Fishery (92-7) by S. Shirley and B. Muse.
- Number of Permits Issued and Number of Permits Fished - By Year and Age - For The Limited Fisheries (92-8) by S. Shirley.
- 1991 Permits Issued and Fished, By Permit Type, Age Class, and Transferability (92-11) by E. Dinneford.

An additional report, A Review of The False Pass and Other Area M Salmon Fisheries By Residency, Gear Type, Species, 1986-1991 (92-18) was prepared by E. Dinneford for the Legislative Affairs Agency. Again, non-confidential reports are available upon request.

* Please read "Notes for Table" at end of table.

Notes for Table:

Total Permanent Permits -- The number of permanent permits may decrease from one year to the next because of revocations.

Permanent Permits Held by Alaskans -- Residency figures were calculated using the permit holder address from 1975-1978. After 1978 permit holders were required to declare their residency status on the renewal form and residency figures were taken from those declarations. These numbers may differ somewhat from those reported in "Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits" published by CFEC. In that report all persons who declared Alaska residency status but had out-of-state addresses are counted as non-residents. Numbers shown in this annual report may differ from those in previous annual reports due to residency status changes resulting from residency investigations. Permits held by the Dept. of Commerce or C.F.A.B. are counted as resident permits.

Total Number of Transfers -- Transfers reported here include foreclosures by the Dept. of Commerce or by C.F.A.B.

Change in Residency Due to Transfers -- These figures may differ from figures reported in previous annual reports due to residency status changes resulting from residency investigations.

Permits with State Liens -- These are permits which have been financed by the Dept. of Commerce or by CFAB or which have been used as collateral against a commercial fishing loan from one of these agencies. These numbers differ from those shown in past CFEC Annual Reports due to permit file corrections and changes in the accounting of foreclosed permits.

Transfer Survey Information -- These surveys were voluntary until January 1, 1980. Many transfers occurred without completion of a survey form during the years 1975-1979. A few surveys are missing for 1980 and 1981.

In addition, there have been six administratively ordered transfers in the 1986-1992 period for which no surveys exist.

Non-monetary/Monetary Transfers -- For the years 1980-1992 any transfer survey with a sale price greater than \$500 was counted as a monetary transfer. All other transfers were counted as non-monetary transfers. For the years 1975-1979 the number of monetary transfers reported here is the number of transfer surveys which were used to compute the average price of permits for use by the Dept. of Commerce and CFAB in their loan programs. These surveys were selected using exclusionary criteria different from the \$500 minimum.

Average Price Paid for Permits -- These figures are the average of the sale price taken from all surveys counted as monetary transfers. For the years 1980-1992 they may vary slightly from the average prices used by the Dept. of Commerce and CFAB which are based on exclusionary criteria different from the \$500 minimum used in this report. A "----" indicates that there were no monetary transfers for this fishery. A "****" indicates confidential information because fewer than four surveys exist.
