State of Alaska
Commercial Fisheries Entry Commission
1996 Annual Report

September 1997

Dear Governor, Legislators, and Fellow Alaskans:

Pursuant to AS 16.43.980, we are pleased to submit the Commercial Fisheries Entry Commission's 1996 Annual Report. As in the past, nearly twice the cost of the Commission's operation was generated from license fees paid into the state general fund.

These are difficult times for many fishers, and the Commission continues to help fishers protect their fishing privileges. We work closely with the Division of Investments, Department of Commerce; the Commercial Fishing and Agriculture Bank, the Alaska Business Development Center, the Child Support Enforcement Division and the Internal Revenue Service.

During 1996, the Commission issued 42,423 licenses, reviewed 1,931 transfer requests, and issued 233 adjudicatory decisions. At various stages of adjudication, 609 cases are before the Commission.

Fishers have petitioned the Commission to limit an additional 24 fisheries. The Commission is reviewing these petitions and will develop proposals for public comment as required by the Limited Entry Act.

The Commission continues to work with the Legislature on various fisheries issues including a bill supported by Governor Knowles to provide the Commission with authority to establish a temporary moratorium in a fishery when required to promote the conservation and sustained yield management and the economic health and stability of a fishery.

We renew our commitment to employ the Limited Entry Act for resource conservation and for prevention of economic distress among fishers and those dependent upon them for a livelihood.

Sincerely,

COMMERCIAL FISHERIES ENTRY COMMISSION

Dale Anderson, Commissioner
Marlene Johnson, Commissioner
Bruce Twomley, Chairman

Introduction

The commercial fishing industry is a basic component of Alaska's resource-based economy and the economic backbone of Alaska's rural fishing communities. The commercial fishing industry is the state's largest source of private sector jobs. The Commercial Fisheries Entry Commission (Commission) is an essential management component for developing and sustaining Alaska's billion dollar fishing industry.

Alaskan voters instituted the Limited Entry Act by voting in 1972 to amend Alaska's constitution to create a system of fishery limitation (Article VIII, Sec. 15). The 1973 Alaska Legislature approved the Limited Entry Act creating a resource agency to promote conservation and sustained yield management of Alaska's fishery resources and the economic health and stability of commercial fishing.

- The Commission became the exempt, independent, quasi-judicial agency to carry out the mandate of the people and Legislature of the State of Alaska.
- To meet these responsibilities, the Commission is organized into four sections: Adjudications, Research, Licensing and Data Processing; (see the chart: "Organization by Agency Function") and engages in the following activities mandated by law (AS 16.43)
- Establishes maximum numbers of entry permits for fisheries to be limited and implements application processes and point systems to rank eligible applicants;
- Processes entry permit applications and adjudicates claims not resolved in initial classification;
- Issues entry permits in limited fisheries, interim-use permits in unlimited fisheries and licenses for all vessels as required to legally participate in the State's commercial fisheries;
- Processes requests for emergency and permanent transfers of entry and interim-use permits and compiles data of all such transfers;
- Enforces provisions of the Limited Entry Act by regulating permit transfer activities;
- Monitors unlimited fisheries to assess the rate of development and the need for limitation;
- Monitors limited fisheries for setting optimum numbers and determining fleet size;
- Participates in research and development of comprehensive fisheries economic data; and

Works with state and federal management agencies to developing and coordinating fisheries' policies.

Since 1973 the Commission has granted more than 10,000 Alaskans permanent access to their valuable fishery resource by limiting entry in 50 different fisheries. The Commission has received petitions for the limitation of 24 additional fisheries.

The percentage of permits held by Alaska residents has remained relatively stable. Today approximately 77% of all permits are held by Alaskans and more than half of that number are held by rural Alaskans.

The drastic declines in salmon prices in recent years due to growing farmed salmon production have imposed hardships on many Alaska fishing families. The Commission is concerned with the efforts by the Internal Revenue Service (IRS) to force the sale of entry permits from local fishers. Together with the Division of Investments, the Commission has helped fishers take advantage of the Tax Obligation Loan Program as a means for fishers to settle their federal tax obligations and protect their fishing privileges. The Commission and others including State and Federal agencies have been meeting with the IRS to explore ways to cooperate and avoid such harm.

In addition to responding to these current and pressing issues, the Commission has continued to perform its primary functions to license fishers, adjudicate claims, perform critical research and provide data to those people and agencies as needed to make the proper policy decisions as detailed in the following sections. Major decisions and activities affecting the Commission's operations in fiscal year 1996 are outlined in the Commissioner's letter to the Legislature and Governor that is part of this report. Prior years' activities and decisions affecting the Commission's operations are included in the appendices.

1996 was a year of transition for the Commission. Commissioner Frank Homan retired after several years of outstanding service. Frank's leadership resulted in many beneficial changes during his tenure. Frank will be missed.

Governor Tony Knowles appointed Marlene Johnson to the Commission to replace Mr. Homan. Marlene is the first woman and first Alaska Native to serve on the Commission. She is an experienced adjudicator and manager and brings a wealth of knowledge to the Commission. Governor Knowles also reappointed Chairman Bruce Twomley who has served since 1982.

As a food source important to the world, Alaskan fisheries must be sustained through sound management and wise commercial development. We at the Commission renew our commitment to apply our resources and tools toward that goal.

Major Decisions/Activities Affecting Agency Operations Fiscal Years 1997-1988

Fiscal Year 1997

- Conducted research, held public hearings and adopted regulations limiting entry into the Southeastern Alaska shrimp beam trawl fishery.
- Conducted research, proposed regulations and held public hearings on limiting entry into the Southeastern Alaska shrimp otter trawl fishery and Goodnews Bay herring gillnet fishery.
- Conducted research, held public hearings and adopted regulations establishing point systems and an application period for the Prince William Sound sablefish and Southeastern Alaska shrimp pot fisheries.
- Conducted research, proposed regulations, held public hearings establishing point systems for the Northern and Southern Southeast herring spawn-on-kelp pound fisheries.
- Received petitions to limit additional fisheries and began required analysis.
- A member of the Commission met with fishers in Goodnews Bay to discuss limiting entry into the Goodnews Bay herring gillnet fishery.
- The Commission participated in the Governor's Salmon Strategy Task Force.
- The IRS conducted a pre-Christmas sale of a Cook Inlet salmon set net permit and sold the permit, valued at \$30,000, for only \$5,005.
- The legislature adopted HJR 23 requesting the Alaska Congressional delegation obtain just relief from the actions of the IRS and ensure the IRS complies with federal law.
- The legislature adopted HB141 which established a four year moratorium on vessels participating in the statewide and Cook Inlet weathervane scallop fisheries.

Fiscal Year 1996

- Conducted research, held public hearings and adopted regulations limiting the Southeastern Alaska dungeness crab, the Prince William Sound sablefish, and the Southeastern Alaska shrimp pot fisheries.
- Conducted research, held public hearings and adopted regulations establishing point systems and an application period for the Southeastern Alaska dungeness crab and the Cook Inlet dungeness crab fisheries.
- Received petitions to limit additional fisheries and began required analysis.
- A member of the Commission and staff participated in the Koliganek Economic Development Council meetings.
- A member of the Commission served on the Child Support Enforcement Division's Rural Task Force, concerning child support and Alaska fishers.
- The legislature adopted HB 297 which raised the annual vessel license fee based on overall length; revenue generated by the increased fees goes to Fish and Game management of fisheries resources.
- The legislature adopted HB 547 which established a four year moratorium on entry into Southeast Alaska dive fisheries.
- The legislature adopted HB 538 which established a four year moratorium on vessels participating in the Bering Sea Korean hair crab fishery and authorized the Commission to develop a vessel permit limited entry program.
- The legislature adopted SB 42 giving the Commission the authority to propose permit stacking (an individual could hold more than one permit up to limits set by the Board of Fisheries).
- The Commission issued the *Carle* decision denying a request by the IRS to transfer a Southeast Alaska salmon purse seine entry permit to the highest bidder in a forced permit auction held in December.
- Representatives from the Commission, other state agencies and Senator Steven's office met with the IRS to explore means to help permit holders achieve voluntary tax compliance and to eliminate forced sales of limited entry permits.
- Commission statutes, regulations, public notices, transfer survey, and staff's email addresses became available to users of the Commission's WWW internet site.

Fiscal Year 1995

- Conducted research, held public meetings and adopted regulations limiting the Northern and Southern Southeast herring spawn-on-kelp pound fisheries.
- Held public meetings in Southeast Alaska to discuss the future of the moratorium in the Southeastern dungeness crab fisheries.
- Received petitions to limit additional fisheries and began required analysis.
- A member of the Commission served on an Alaska Federation of Natives (AFN) Task Force concerning the IRS and Alaska fishers.
- A member of the Commission served on a Bristol Bay Native Association Commission to address issues

concerning limited entry.

- The Commission participated in the Governor's Salmon Strategy Task Force.
- The legislature adopted SB 251 (Ch 62, SLA 1994), which authorized the existing Commercial Fishing Loan Program to lend up to \$30,000 to fishers in danger of IRS seizure and forced sale of their entry permits.
- The Commission, together with the Division of Investments and the AFN, persuaded the IRS not to implement its new electronic levy program against those fishers eligible for the new loan program.
- The Commission, together with the Division of Investments, the IRS, and AFN, developed and began outreach to implement the new Commercial Fishing Tax Obligation Loan Program.
- The Commission's Bulletin Board System became available to Internet.

Fiscal Year 1994

- Adopted optimum number regulation for the Southeastern Alaska roe herring purse seine fishery. (*Johns v. State*, CFEC)
- Conducted research, held public hearings, and adopted regulations limiting the Cook Inlet dungeness crab fishery.
- Conducted research and prepared a report on the Southeastern Alaska dungeness crab fishery to assist in determining if some form of limited entry is warranted for the fishery following the moratorium.
- Participated in the AFN Task Force concerning the IRS and Alaska commercial fishers.
- Advocated legislation (SB 251) to expand the commercial fishing revolving loan fund to offer loans for past due federal tax obligations.
- Developed new licensing system to run on the Commission's local area network (LAN) rather than the state mainframe computer.
- Continued to defend state against elimination of nonresident fee differential. *Carlson v. CFEC*.

Fiscal Year 1993

- Completed optimum number study for the Southeastern Alaska roe herring purse seine fishery.
- Proposed optimum number regulation pursuant to the study.
- Conducted workshops related to getting and keeping limited entry permits in local communities.
- Commissioners and hearing officers each completed more than 100 adjudicatory decisions. Among the nearly 1,000 decisions issued since 1983, only one has been reversed by the Alaska Supreme Court.
- Conducted many research projects in response to requests from the Commission and others (for example, limited entry studies, Alaska Board of Fisheries (ABF), Alaska Department of Fish and Game (ADF&G), Governor's

Office, fishing associations and Legislators).

Fiscal Year 1992

- Conducted workshops to help rural Alaskans in getting and keeping limited entry permits in their local communities.
- Completed initial classification of Western Alaska herring and Togiak herring spawn-on-kelp fisheries applications.
- Continued an optimum number study for the Southeastern Alaska roe herring purse seine fishery.
- Conducted research, held public hearings, adopted regulations and implemented a moratorium (in response to HB 137 from the previous year) in the Southeastern Alaska dungeness crab fishery (more than 300 eligible to apply).
- Aided the ABF in its creation of a new open access salmon set net fishery around Atka Island for the 1992 season, for the commercial harvest of local pink salmon stocks.

Fiscal Year 1991

- Togiak herring spawn-on-kelp fishery point system adopted, application period began, approximately 500 applications were received. Initial classification of approximately half of the 1,813 Western Alaska herring permit applications completed.

Fiscal Year 1990

- Exxon Valdez oil spill continued to make demands on Data Processing and Research sections for services required to respond to legal activity.
- Western Alaska herring fisheries point systems finalized, and almost 1,100 applications received.
- Togiak herring spawn-on-kelp fishery researched, hearings held, and fishery limited.FY89:
- Research and hearings on Western Alaska herring fisheries point systems.
- *Wassillie* settlement finalized; processing of 273 applications began.
- Alaska Supreme Court decision in *Johns* case; extensive research and data analysis for optimum number determinations began.
- Exxon Valdez oil spill in Prince William Sound created significant demand for Data Processing services to assist affected fishers.

Fiscal Year 1989

- Research and hearings on Western Alaska herring fisheries point systems.
- *Wassillie* settlement finalized; processing of 273 applications began.
- Alaska Supreme Court decision in *Johns* case; extensive research and data analysis for optimum number determinations began.
- Exxon Valdez oil spill in Prince William Sound created significant demand for Data Processing services to assist affected fishers.

Fiscal Year 1988

- Research and hearings on Prince William Sound herring spawn-on-kelp pound fishery point system and processing of 140 applications began.
- Processing of 213 applications for the Southeast sablefish fisheries began.
- Western Alaska herring fisheries researched, extensive hearings in Western Alaska villages held, and five fisheries limited.

Adjudications

Overview

The Adjudications Section processes applications for entry permits in limited fisheries and conducts hearings for those contesting Commission decisions affecting them. The section also investigates potential violations of Commission statutes and regulations, and provides assistance to other enforcement agencies.

Entry permit applications are first evaluated by Commission paralegals who classify applicants in a ranking system that measures each applicant's past participation and economic dependence on the fishery. Applicants who disagree with their initial classifications may request hearings. Hearings are also available to contest initial decisions about permit transfer requests or qualifications for reduced (poverty) permit renewal fees.

Commission hearing officers conduct administrative hearings throughout the State and decide appeals of initial determinations about entry permit applications, permit transfer requests, and fee arrearages charged to those who wrongly claimed to be Alaska residents. The Commissioners review and may affirm or modify hearing officers' decisions on their own motion, or upon the request of an affected party.

Commission hearing officers also preside in "show cause" hearings. In these proceedings, the Commission may impose fines, or revoke or suspend the permits of those who attempt to mislead the Commission with false information. These hearings are held in the presence of the Commissioners.

Administrative Proceedings and Decisions

The hearing officers issued 123 decisions in 1996: 58 on permit applications, 43 on permit transfers, and 22 on miscellaneous actions. Commission paralegals decided 39 appeals of denied emergency transfer requests in 1996. At the end of the year, 394 cases were in various stages leading up to the issuance of a decision by a hearing officer.

Decisions Completed

The Commissioners adjudicated a total of 110 cases during 1996: 51 permit applications, 43 permit transfers, and 16 miscellaneous actions. At the end of the year, 215 cases were in various stages of the adjudication process leading to the issuance of final decisions by the Commissioners.

Judicial Rulings and Appeals

The Alaska Supreme Court's only decision on limited entry law during 1996 was *Carlson v. State*, CFEC, 919 P.2d 1337, (Alaska 1996). The *Carlson* case is a class action challenging higher permit fees charged to nonresidents of Alaska. In an earlier ruling, the court held nonresident fees must be "substantially equal to those which must be paid by similarly situated residents when the residents' pro rata share of state revenues to which nonresidents make no contribution are taken into account." The 1996 *Carlson* decision addressed the formula used for comparing resident and nonresident contributions to the State's costs of managing and promoting commercial fisheries and remanded the case to the Superior Court to apply this formula.

Help for Individual Fishers in Financial Crisis

To help individual fishers respond to financial crises and protect their fishing privileges, the Commission participated in the new Rural Task Force sponsored by Child Support Enforcement Division of the Department of Revenue, The Bristol Bay Native Association (BBNA) Commission on Limited Entry, and the Alaska Federation of Natives Task Force on the Internal Revenue Service (IRS). The Commission also worked closely with the Division of Investments, Department of Commerce, the Commercial Fishing and Agriculture Bank, and the Alaska Business Development Center. Additionally, with the Commission's encouragement, the Bristol Bay Economic Development Corporation and the BBNA together established the Bristol Bay Permit Brokerage. These collaborations helped the Commission provide referrals for commercial fishers facing serious financial problems that could ultimately endanger their fishing privileges.

The Commission also continues to cooperate with the IRS in an effort to help permit holders achieve voluntary federal tax compliance. The Commission's efforts have included support for the Fisher's Tax Obligation Loan Program administered by the Division of Investments.

Despite the State's efforts to cooperate, shortly before Christmas of 1996, IRS gave the State only two days' notice of the forced sale of two entry permits offering minimum bids at a fraction of the permits' estimated value.

The Alaska Business Development Center, with support from Senator Ted Stevens and Representative Don Young, intervened and one of the sales was avoided. However, despite this intervention and attempt to help the fisher, the IRS sold the remaining fishing privileges held by an older Alaska Native for \$5,005. The estimated value of the fishing privileges is \$30,000.

Affidavits provided to CFEC state an IRS Revenue Officer advised possible buyers as follows: in order to pursue the IRS' present dispute with the State, the IRS intended to sell the particular permits for "substantially below the permits' fair market value" and, once a permit was transferred, it would "open the floodgates" of permit seizures by the IRS. The affiants stated the Revenue Officer volunteered "the Commissioner of the IRS is aware of the situation and the matter is receiving attention at the highest levels at the IRS Washington D.C., headquarters."

Because the buyer withdrew, the sale was not completed by the IRS, and the Alaska Business Development Center has had further opportunity to work with the permit holder in attempt to achieve an agreement with the IRS. The Alaska Business Development Center reported to the Commission that, during the year before the sale, the permit holder had paid the IRS a substantial installment toward his tax obligation.

Despite these disturbing Christmas holiday events, the Commission continues to work with the IRS to help fishers achieve voluntary compliance. We are very grateful to the individual Revenue Officers who have diligently worked with fishers--particularly those in isolated Alaskan communities. We hope IRS will recognize these and other continuing cooperative efforts are in the best interests of the public and long-term revenue collection.

We continue to work with the Division of Investments, Department of Commerce in seeking an extension of the fishers' Tax Obligation Loan Program.

Licensing

Overview

During 1996, staff in the licensing section became increasingly aware of the rapid rate of change and growing complexity of Alaska's fisheries and licensing requirements. Several years ago there were a few fairly simple, straightforward programs and rules to keep track of; now an increasing burden is placed upon licensing staff to keep up with the changes as the Commission limits additional fisheries, the legislature enacts fishery moratoriums and new types of permitting mechanisms, the Board of Fisheries adopts regulatory changes and federal agencies continue to develop moratoria, license limitation, IFQ and CDQ programs. As a primary contact for those involved with Alaska's fisheries, the licensing section strives to be informed and able to provide current, accurate information in response to inquiries and refer callers to appropriate sources for further information. Responding to information requests has become a major function of the section, and demands more staff time each year. To cope with increasing demands within budgetary constraints, the licensing section seeks to streamline procedures and automate processing whenever possible.

The total number of permits and vessel licenses issued for 1996 continued to decline as it has for several years. However, the number of vessels licensed did increase slightly over the previous year. The drop in the number of annual permits parallels a decrease in the number of fishers participating in Alaska's fisheries. The table below demonstrates changes in the number of fishers, permits and vessels licensed over the period 1991-1996.

The decline in numbers of permits is most evident in the miscellaneous finfish, halibut and black cod fisheries.

Year	Fishers	Resident	Non Resident	Permits	Vessels	Total Licenses
1991	17,944	13,791	4,153	32,524	17,580	50,104
1992	17,635	13,479	4,156	32,219	17,194	49,413
1993	16,561	12,579	3,982	29,511	16,276	45,787
1994	16,408	12,579	3,829	28,633	16,259	44,892
1995	15,853	12,014	3,839	27,153	16,277	43,430
1996	15,261	11,494	3,767	26,122	16,301	42,423

New Developments

Southeast Dive Fishery Moratorium

During 1996, the licensing section was involved in implementing a variety of new programs. The dive fisheries in Southeast Alaska which harvest abalone, geoduck, sea cucumber and sea urchin went under a moratorium which took effect mid-summer pursuant to HB 547. Procedures and application forms were developed for issuance of permits for

the fall fisheries. Applications were mailed in mid-August to fishers known to be eligible to participate during the moratorium. Subsequently, the Department of Fish and Game determined the abalone fishery would remain closed, rather than opening in October as scheduled. Because of delays in approval of the sea urchin Fishery Management Plan, that fishery did not open until after the end of the year. Eligible divers were able to harvest geoduck and sea cucumbers during the fall fishery.

Licenses Issued by Month

Bering Sea Korean Hair Crab Vessel Permit Moratorium

Legislation was enacted during 1996 which placed the Korean Hair crab fishery occurring beyond five miles from shore in the Bering Sea under a moratorium. The legislation specified vessel permits be issued to qualified vessels during the moratorium, creating an entirely new type of permit than any previously issued by the Commission. Historically, limited entry and interim-use permits are issued to the individual gear operator or skipper, rather than to the vessel owner. Application forms and procedures for administering the vessel permit program were developed over the summer and the first moratorium vessel permits were issued in September. A total of 18 Korean hair crab vessel permits were issued for the 1996 season.

PWS Sablefish Limitation

The first interim-use permits for the Prince William Sound sablefish fixed, net and pot gear fisheries were issued since the fishery was limited in 1995. This added a new complication to the fishery code system as these permits have vessel length restrictions incorporated in the fishery code. For example, in fishery code "C4AE" the C indicates sablefish, 4 indicates net gear, A indicates vessel length may be no greater than 90' overall and E indicates the area is Prince William Sound.

Southeast Dungeness Crab Limitation

A fishery code system was adopted for the Southeast dungeness crab pot fishery in which the tier indicating the number of pots authorized by the permit is part of the fishery code. In the D9AA fishery code, the first A indicates up to 300 pots may be fished; a D9DA permit allows only 75 pots to be fished (or 25% of the maximum pots allowed by the Board of Fisheries).

New Vessel License Fees

In accordance with HB 230 enacted during 1995, vessel license fees for 1996 were based upon the overall length of the vessel, rather than the flat \$20 fee which had been in effect since the 1970s. There are now six categories of vessel license fees ranging from \$20 to \$750.

The table on the following page shows counts of permits by type, as well as vessels licensed and numbers of resident and nonresident fishers.

Permit Transfers

The number of requests for permanent and emergency transfer reviewed during 1996 totalled 1,931, slightly down from the 1995 level of 1,984. 1996 was the second consecutive year in which the number of emergency transfer requests declined; the total was 937 (compared to 946 in 1995 and 974 in 1994). Approximately 994 permanent transfer requests were reviewed during 1996, compared to 1,079 during 1995.

Permanent and Emergency Transfers

Licenses Issued for 1996

Limited Entry Permits <i>Not</i> Renewed	618
Limited Entry Permits with Fees Waived*	210
Limited Entry Permits Revoked or Lapsed (since 1975)	767
Limited Entry Permits Renewed	12,519
Interim Permits in Fisheries Under Limitation or Moratoria	1,443
Interim Permits in Open-to-Entry Fisheries	12,119
Special Harvest Area (Hatchery) permits	22
Educational Entry Permits	1
Vessel Permits **	18

Total Permits Paid for 1996 26,122

Vessels Licensed for 1996 16,301

Total Permits and Vessel Licenses 42,423

Alaska Resident Permit Holders	11,494
Nonresident Permit Holders	<u>3,767</u>

Total Permit Holders 15,261

*Fees for limited entry permits may be waived in the event of season-long closures.

**Vessel permits were issued for the first time in 1996 in the Bering Sea Korean hair crab fishery.

Permanent Transfers

A breakdown of **permanent transfer requests** by type of transfer is shown below:

Regular Transfers	908	
Survivorship Transfers to Spouse	30	
Foreclosure Transfers by Loan Agencies	3	
Total Approved		941
Denied Transfers	31	
Withdrawn Transfer Requests	22	
Total Reviewed		994

See the tables at the back of this report for additional information relating to permanent transfers.

Emergency Transfers

Of the 937 emergency transfer requests reviewed, 845 were approved on initial review, 81 were denied and 11 requests were withdrawn prior to a determination. Administrative hearings were requested by 38 of the denied applicants and following the hearings, 28 of those requests were granted, while 10 of the denials were upheld.

The final count of emergency transfers approved was 872, involving 834 permits; some permits were transferred more than one time during the year. (806 permits were emergency transferred once, 26 transferred twice, and 2 permits were transferred 3 or more times during the year.)

New Vessel License Fee Categories

1996 vessel license application fees were based on overall length of vessels. Instead of the \$20 fee which previously applied to all vessels, the new fee categories range from \$20 for vessels 25' and under up to \$750 for vessels over 250'. The number of vessels in each category and the revenue generated from license fees is shown below:

* Vessels counted in the "unknown" category include those renewed as "two year renewals" during 1994 and 1995; the owners had opted to renew for 1996 at the same time (and for the same fee) as the 1995 renewal so they were not subject to the new length categories.

Category	Number	Fee	Revenue
=====	=====	=====	=====
Unknown *	1,139	\$ 20	\$ 22,780
A - 25' and under	6,298	\$ 20	\$ 125,960
B - over 25' - 50'	7,476	\$ 50	\$ 373,800
C - over 50' - 75'	891	\$ 100	\$ 89,100
D - over 75' - 150'	348	\$ 250	\$ 87,000
E - over 150' - 250'	124	\$ 500	\$ 62,000
F - over 250'	25	\$ 750	\$ 18,750
=====	=====	=====	=====
Total	16,301		\$ 779,390

Two year renewal of vessel licenses was no longer available as an option in 1996. It created problems in the past and made it difficult to get timely and accurate information pertaining to addresses, vessel activities and registrations for various fisheries which often change on an annual basis.

Field Office Operations

Licensing section staff again provided licensing and transfer assistance in Dillingham and King Salmon during 1996. The Dillingham office was staffed prior to the herring season from April 23-27 and for salmon from June 10-21. The King Salmon office was operated June 10 - July 17. The field offices generated \$10,060 in "user fees" to cover operating costs. Staff assisted with 148 emergency transfer requests and issued approximately 988 permits and vessel licenses.

Field Office	Permits Issued	Vessels Licensed	Total
Dillingham	373	168	541
King Salmon	281	166	447
Total	654	334	988

Research

Overview

The research section provides background analyses and studies needed by the Commission. The research section, coupled with the Commission's data processing section, also produces basic economic data on Alaska's fisheries used to address policy questions. Standard or specialized reports serve the data needs of users outside the agency.

In 1996, the Commission's research staff was involved in many projects. These projects included efforts to monitor trends in Alaska's fisheries, to evaluate the need for access controls in particular fisheries, and to provide other agencies and users with needed data and analyses.

The staff produced analyses on issues for the Legislature, the Office of the Governor, the Alaska Department of Fish and Game (ADF&G), and the Alaska Board of Fisheries (ABOF). In addition, the staff answered numerous information and data requests from the general public. The following paragraphs provide brief highlights of major 1996 events for which the research section provided analyses and data support.

New Amendments To The Limited Entry Act

During 1996, Alaska's legislature passed three new amendments to Alaska's limited entry law (AS16.43). Each amendment was designed to address problems in particular fisheries. The following paragraphs provide a brief summary of these 1996 statutory changes.

Permits With Fishing Capacity Restrictions

In 1995, the legislature amended the Limited Entry Act to allow the Commission to restrict fishing capacity authorized under individual limited entry permits in newly limited fisheries. The Commission may define fishing capacity in terms of quantity of fishing gear, a proportion of the maximum amount of gear that can be utilized in the fishery under regulations of the Board of Fisheries, fishing vessel size, or other vessel characteristics associated with fishing power. The new provision allows the Commission to pass regulations restricting the fishing capacity associated with a limited entry permit based upon an applicant's past performance in the fishery.

The legislation, CSHB 107 (FSH), amended portions of AS 16.43.270 and AS 16.43.150 and became effective on September 14, 1995. This new amendment to the limited entry law provides the Commission with the flexibility to design programs that contain post-limitation growth in fishing capacity.

During 1996, the statute was further altered to allow the Commission to adopt regulations allowing persons to hold up to two entry permits for purposes of fishing an entire unit of gear in fisheries where the Commission restricts the

fishing capacity of some entry permits to less than a full unit of gear. The legislation, SB 42, became effective on June 12, 1996. It was incorporated into statute as AS 16.43.140(c)(4).

SB 42 was supported by some fishers in the Southeast dungeness crab pot fishery that had been limited under a "tiered-pot" system in 1995. If the Commission adopts a regulation allowing a person to hold up to two permits for purposes of fishing up to a full unit of gear, then a consolidation of the number of fishing operations in the fleet may occur as a result. However, at this point, the Commission wants to wait and see how the new "tiered-pot" system works before considering an additional regulatory proposal.

Southeast Alaska Dive Fisheries Moratorium

During 1996, the legislature passed a temporary (up to four year) moratorium in the Southeast Alaska dive fisheries. The legislation, HB 547, was incorporated into statute as AS 16.43.228. The moratorium restricts interim-use permits in the Southeast Alaska abalone, geoduck, sea cucumber, and sea urchin fisheries.

The legislation temporarily halts growth in the number of participants in these fisheries and does so in a fashion that could not be addressed readily under the pre-existing statutes. HB 547 provides the specific eligibility criteria to be used in each fishery. The new legislation and a cooperative development effort between ADFG, dive fishers, and processors made possible a commercial sea urchin dive fishery in Southeast Alaska.

The moratorium became effective on July 1, 1996 and will expire automatically on June 30, 2000 if the Commission or the legislature does not develop a permanent access restriction program. During the moratorium, the legislation directs the Commission to consult with the Board of Fisheries, the Alaska Department of Fish and Game, and the participants in these fisheries about a permanent limited entry program. The legislation directs the Commission to investigate the need for a permanent limited entry program and to determine the type of limited entry program that would be most appropriate for these fisheries.

The Bering Sea Korean Hair Crab Fishery Moratorium

During 1996, the legislature amended the limited entry act to provide for a moratorium on commercial fishing vessels used in the Bering Sea Korean hair crab fishery that occurs beyond five miles from shore. The legislation, HB 538, was incorporated into law as AS 16.43.901 - AS 16.43.911. The law became effective on July 1, 1996.

Under this new amendment, the legislature chose to limit the eligible fishing vessels rather than the skippers or permit holders. The act establishes a vessel permit for eligible vessels. The moratorium is a temporary, four-year moratorium which will expire automatically on June 30, 2000 if the legislature does not adopt a permanent limited entry system for the fishery.

New Limitations And Moratoria

In 1996, the Commission implemented moratoria as directed by amendments to the limited entry act noted above. A vessel moratorium was implemented in the Bering Sea Korean hair crab fishery that occurs beyond five miles from shore. A moratorium on interim-use permits was implemented in the Southeast Alaska dive fisheries (abalone, geoduck, sea cucumbers, and sea urchins). These moratoria are four-year, temporary programs that will expire

automatically on June 30, 2000 if permanent restricted access programs are not developed.

The Commission received petitions to limit other fisheries in 1997. The research staff studied several of the fisheries involved to determine if access restrictions were needed and to determine if a license-type limited entry program could be designed that would produce significant management, conservation, and economic benefits.

On December 31, 1996 the Commission proposed limited entry for the Southeast Alaska beam trawl fishery and the Southeast Alaska otter trawl fishery. Both fisheries experienced an increase in effort after the Commission's decision to limit the Southeast Alaska pot shrimp fishery. Public comment on these proposals will extend into 1997.

Each year, as Alaska's unlimited fisheries grow in value and face increasing fishing pressure, the Commission receives requests to limit entry into additional fisheries. Pressure on state-managed fisheries may continue to increase as fisheries under federal management are restricted to control effort.

In 1995, National Marine Fisheries Service implemented individual fishing quota (IFQ) access restriction programs for sablefish and halibut. These new programs and the efforts of the North Pacific Fishery Management Council (NPFMC) to rationalize other fisheries under their jurisdiction may lead to "spillover effects" and increases in effort in some of Alaska's unlimited fisheries in the near future.

Point System Proposals and Application Periods

Under AS 16.43, the Commission must develop a hardship ranking system or point system to determine who will receive a limited entry permit in a newly limited fishery. During 1996, the Commission's research staff worked on point system alternatives for several of the recently limited fisheries. These fisheries include the Southeast Alaska dungeness crab pot, ring net, and dive fisheries; the Southeast Alaska pot shrimp fishery; the Prince William sound sablefish fixed gear, pot gear, and net gear fisheries; the Northern Southeast spawn-on-kelp pound fishery; and the Southern Southeast spawn-on-kelp pound fishery.

The following paragraphs briefly summarize 1996 developments on hardship ranking systems and the current status of the limitation process for some recently limited fisheries.

Cook Inlet Dungeness Crab Pot and Ring Net Fisheries

Point system regulations for these fisheries were adopted during 1995. An application period for permanent permits was held from September 16, 1996 through December 30, 1996. Applications will be evaluated and permits issued under the point system during 1997.

Southeast Alaska Dungeness Crab Pot, Ring Net, and Dive Fisheries

Point system alternatives for these fisheries were developed during 1995 and early 1996. On April 12, 1996 the Commission proposed point system regulations. Public hearings were held throughout Southeast Alaska and the public comment period went through May 21, 1996. The Commission adopted point system regulations for these fisheries on June 6, 1996.

An application period for permanent permits was held from September 3, 1996 through December 16, 1996. Applications will be evaluated and permits issued under the point systems during 1997.

In addition, the Commission's regulations limit the fishing capacity of the permits issued for the Southeast Alaska dungeness crab pot fishery. In 1995, the Commission adopted a slightly modified version of one of their original tiered-pot level proposals. Beginning with the 1997 season, Southeast Alaska dungeness pot permits will be issued in one of 4 tier classes, currently the tier classes are 75 pots, 150 pots, 225 pots, and 300 pots. The holder of a pot permit will be able to utilize up to the number of pots allowed under the tier class on the holder's permit.

Southeast Alaska Pot Shrimp Fishery

Point system alternatives for this fishery were developed during 1996. On August 23, 1996 the Commission proposed point system regulations. Public meetings were held throughout Southeast Alaska and the public comment period on the proposal went through September 30, 1996. The Commission adopted point system regulations for the fishery on October 2, 1996. An application period is scheduled from mid-March through mid-June of 1997.

Northern Southeast and Southern Southeast Herring Spawn-On-Kelp Pound Fisheries

The Commission worked on point system alternatives for these fisheries during 1996. A regulatory proposal is expected in early 1997.

The maximum number for the Northern Southeast spawn-on-kelp pound fishery is 109 and the maximum number for the Southern Southeast spawn-on-kelp pound fishery is 229 permits. Eligibility for interim entry permits in these fisheries is restricted to those who participated as permit holders and commercially harvested the resource prior to January 1, 1995.

Prince William Sound Sablefish Fixed, Net, and Pot Fisheries

The Commission worked on point system alternatives for these fisheries during 1996. A regulatory proposal is expected in early 1997.

The Prince William Sound fixed gear sablefish fishery was limited with a maximum number of 49. The fixed gear definition includes longlines and any other legal gear that uses a fishing hook. The Prince William Sound sablefish net gear fishery was limited with a maximum number of one. The net gear definition includes trawls and any other legal net gear. The Commission also limited the Prince William Sound sablefish pot gear fishery with a maximum number of one.

In addition, the Commission's regulations limit the fishing capacity of the permits issued for the Prince William Sound sablefish fishery. These regulations (20 AAC 05.779-780) were passed under the authority of the new amendment to the limited entry law cited above.

Beginning with the 1996 season, permits were restricted to one of four vessel length categories. The vessel length categories are 35 feet, 50 feet, 60 feet, and 90 feet. An applicant will be restricted to a vessel that is no longer than the

maximum length allowed under the vessel class shown on the applicant's permit.

Optimum Numbers And Fleet Reductions

Development of a viable fisherman-funded fleet reduction program will depend upon a satisfactory resolution of some of the issues raised by the Alaska Supreme Court in *Johns v. State*, CFEC, 758 P.2d 1256. During 1996, the Commission maintained its dialogue with individuals and gear groups interested in gear reductions.

As noted above, a "market" method for voluntary consolidations into lower cost operations that is distinct from an optimum number decision and government-run buyback program may eventually develop in fisheries that are covered by a new 1996 amendment to the law (see AS 16.43.140 (c) (4)). The amendment allows the Commission to adopt regulations allowing a person to hold up to two entry permits in a fishery where the Commission has restricted fishing capacity by issuing permits for less than a full unit of gear (see AS 16.43.270 (d)).

This "stacking provision" is favored by some Southeast Alaska dungeness crab pot fishers as an addition to the new tiered-pot limited entry system. If the Commission adopts regulations for the fishery under this statutory amendment, a person will be able to hold up to two permits and fish a number of pots commensurate with the sum of the pots allowed under each permit as long as the person does not exceed the maximum number of pots allowed under regulations of the Alaska Board of Fisheries.

Under such a provision, the number of use-privileges in the fishery would remain the same but the number of actual fishing operations could change frequently as permits are purchased and sold by fishers. To date, the Commission has not adopted regulations under the statutory amendment. Southeast dungeness fishers are divided as to the merits of a stacking provision at this time and the Commission wants to observe how the new tiered-pot system is working before considering such a regulatory proposal.

Research On Individual Fishing Quota Programs

The North Pacific Fishery Management Council (NPFMC) adopted new individual fishing quota management programs (IFQ) for Alaska's halibut and sablefish fisheries. These programs were implemented for the first time in 1995. The new IFQ programs are administered by the National Marine Fisheries Service's Restricted Access Management Division (NMFS-RAM).

These programs represent a dramatic change from an open access fishery and a considerable change from a license-type limited entry program. In Alaska, the IFQ programs have been controversial since prior to their conception. While the NPFMC built many constraints into these programs to retain the pre-IFQ character of the fleet, some Alaskans fear dramatic changes in these fisheries under IFQs and some fishing communities may suffer losses in their economic base.

Governor Knowles is also concerned about the potential effects of the new individual fishing quota programs and asked the state and NMFS to study and monitor changes occurring under these new IFQ programs. In 1995 and 1996, NMFS-RAM and the state formed a study team and developed several study projects to examine changes under the IFQ programs. The Commission carried out three of the studies and reported the results at the September 1996 NPFMC meeting in Sitka, Alaska.

Two of the the Commission's studies were partially funded by a NOAA award. The reports for these two studies are available from the North Pacific Fishery Management Council in Anchorage and are titled:

- Changes Under Alaska's Halibut IFQ Program, 1995.
- Changes Under Alaska's Sablefish IFQ Program, 1995.

The third report focused on fishing operations in a management area during the 1991 to 1994 time period but did not receive an initial quota share allocation for the area under the IFQ program. This study is being reviewed and will be released during 1997.

Other Projects And Reports

The research staff also produced monthly permit value estimates for the Department of Commerce and Economic Development and other users and produced basic information tables on many Alaska commercial fisheries. The research and data processing sections also worked to produce reports on Alaska's fisheries which were used in the National Marine Fisheries Service (NMFS) publication *Fisheries of The United States*, 1995.

During the year, other reports for the Commission and other analyses were requested by the Office of the Governor, the Department of Fish and Game, the Board of Fisheries and the Alaska Legislature. The following is a listing of non-confidential reports authored or co-authored during 1996 by Commission staff members.

- Area M Purse Seine Vessels (96-1N) by S. Shirley
- Alaska Commercial Salmon Catches (96-2N) by K. Iverson and S. Shirley.
- Preliminary 1995 Summary Data On The Halibut And Sablefish IFQ Programs: With Special Emphasis On The Sitka Census Area (96-3N) by E. Dinneford.
- Data On Permit Holdings And Landings By Persons From The Sitka Census Area(95-4N) by S. Burns, S. Shirley, and E. Dinneford.
- Preliminary Data On The Southeast Dive Fishery, 1983-1995 (96-5N) by A. Tingley.
- Harvest and Earnings Data For The Togiak Roe Herring Gill Net Fishery By Resident-type, 1975-1995 (96-6N) by A. Tingley.
- Changes In The Distribution Of Alaska's Commercial Fisheries Entry Permits, 1975-1995. (96-13N) by A. Tingley and E. Dinneford.

Revenue

The Commission generates revenue primarily from two sources: the issuance of commercial fishing permits and vessel licensing. Additional revenues come from research and data processing for services and reports requested by the public, fishing organizations and fisheries research groups. Total revenue for FY96 was 5.1 million. This increased from FY95 because a statutory change increased vessel licensing fees which now vary from \$20 to \$750 based on vessel length.

A portion of revenue generated by the agency comes from federal funding for work performed in developing data for federal reports and research projects. Although the amount is small, there is a significant increase in federal funding collected than in prior years.

The Commission operates on general fund program receipts, meaning the income it generates funds the overall operation of the agency. To date, about twice as much revenue is generated than spent on the operational budget of the agency. The agency has been operating on a maintenance budget for several years and applying its resources toward priority demands.

* Please read "Notes for Table" at end of table.

Notes for Table:

Total Permanent Permits -- The number of permanent permits may decrease from one year to the next because of revocations.

Permanent Permits Held by Alaskans -- Residency figures were calculated using the permit holder address from 1975-1978. After 1978 permit holders were required to declare their residency status on the renewal form and residency figures were taken from those declarations. These numbers may differ somewhat from those reported in "Changes in the Distribution of Alaska's Commercial Fisheries Entry Permits" published by CFEC. In that report all persons who declared Alaska residency status but had out-of-state addresses are counted as non-residents. Numbers shown in this annual report may differ from those in previous annual reports due to residency status changes resulting from residency investigations. Permits held by the Dept. of Commerce or C.F.A.B. are counted as resident permits.

Total Number of Transfers -- Transfers reported here include foreclosures by the Dept. of Commerce or by C.F.A.B.

Change in Residency Due to Transfers -- These figures may differ from figures reported in previous annual reports due to residency status changes.

Permits with State Liens -- These are permits which have been financed by the Dept. of Commerce or by CFAB or which have been used as collateral against a commercial fishing loan from one of these agencies. These numbers differ from those shown in past CFEC Annual Reports due to permit file corrections and changes in the accounting of foreclosed permits. These figures represent permits which had at least one outstanding lien sometime during the year held by yearend permit holders.

Transfer Survey Information -- These surveys were voluntary until January 1, 1980. Many transfers occurred without completion of a survey form during the years 1975-1979. A few surveys are missing for 1980 and 1981.

In addition, there have been ten administratively ordered transfers in the 1986-1994 period for which no surveys exist.

Non-monetary/Monetary Transfers -- For the years 1980-1994 any transfer survey with a sale price greater than \$500 was counted as a monetary transfer. All other transfers were counted as non-monetary transfers. For the years 1975-1979 the number of monetary transfers reported here is the number of transfer surveys which were used to compute the average price of permits for use by the Dept. of Commerce and CFAB in their loan programs. These surveys were selected using exclusionary criteria different from the \$500 minimum.

Average Price Paid for Permits -- These figures are the average of the sale price taken from all surveys counted as monetary transfers. For the years 1980-1994 they may vary slightly from the average prices used by the Dept. of Commerce and CFAB which are based on exclusionary criteria different from the \$500 minimum used in this report. A "---" indicates that there were no monetary transfers for this fishery. A "****" indicates confidential information because fewer than four surveys exist.
