

Class Outline – Part 1 (Group)

Introduction:

The Classification Plan is the framework of position descriptions and class specifications. Within the plan, each position is assigned to a job class based on duties, responsibilities, and requirements of training or experience. Positions in a job class are treated the same for personnel administration purposes including required qualifications, basic pay, and layoff/recall.

The Classification Outline is the hierarchy by which various job classes and class series are sorted into Job Families and Occupational Groups.

Occupational Groups consist of Job Families that encompass relatively broad occupations, professions, or activities.

Job Families consist of job classes and class series that are related as to the nature of the work performed. The nature of the work includes the kind of work performed as shown by such elements as the subject matter, profession, or occupation. Typically, for all job classes in a family, initial preparation for employment is similar and the classes exhibit a logical relationship for career progression. Job classes within a Job Family are treated similarly for purposes of personnel administration.

Class Codes:

Each job class for positions in the Partially-Exempt and Classified Services is assigned a unique six-digit alpha-numeric Class Code that indicates the class' placement within the Classification Outline. The first character (P) indicates the class is included in the Classification Plan. The second character is an alphabetic indicator of the Occupational Group. The third and fourth characters are numeric indicators of the Job Family within the Occupational Group. The fifth and sixth characters are numeric indicators of the specific job class within the family.

Initial Preparation Definitions:

The following phrases have the definition provided when used to describe methods of initial preparation for employment. Other terms or phrases are used when greater clarity can be provided.

"general education" means a high school diploma or the equivalent.

"advanced education" means a bachelor's degree related to the occupational field.

"general advanced education" means a bachelor's degree in any field.

"specialized training" means formal training as is typical of a vocational school.

"on-the-job training" means one learns the work after being hired.

Benchmark Job Classes:

Representative job classes within each job family are selected as benchmark classes. The job classes selected as benchmarks will be identified in Part 1 of the Classification Outline by an asterisk after the Class Code.

Class Outline – Part 1 (Group)

Category Definitions:

The category of the type of work performed by each class in the family is indicated by an alphabetic code. The category codes, names, and descriptions are below.

A Clerical/Technical/Paraprofessional

Work involving processing data, normally initiated elsewhere, that is subject to verification, revision, correction, and forwarding for action or substantial elements of the work of a professional, scientific, or administrative field, typically performed in a supportive role. The work typically requires contact with the general public, the ability to follow specific procedures, explain, interpret, and apply established policies and procedures, and retrieve records and related information.

B Professional/Managerial

Work involving the exercise of creative, analytical, evaluative, and interpretive ability with discretion, judgement, and personal responsibility for the application of an organized body of knowledge that requires a range and depth of specialized and theoretical knowledge of principles, concepts, and practices that is constantly studied to improve data, materials, and methods or involving the primary responsibility for planning, organizing, directing, and controlling resources and program delivery.

C Skilled Craft/Labor

Work involving repetitive operations using physical skill and energy. The work requires a thorough and comprehensive knowledge of the processes involved which is typically acquired through on-the-job training and experience or through apprenticeship or other formal training program.

D First Responder

Work involving providing for the safety and security of the public and protection from destructive forces. The work requires specialized knowledge and training to enforce laws and respond to situations endangering life or property.
