ACKNOWLEDGEMENTS

We wish to thank the primary and secondary mortgage lenders listed below for responding to our quarterly survey of mortgage loan activity and for their willingness to continue to participate in future surveys.

Alaska Home Mortgage
Alaska Housing Finance Corporation
Alaska Pacific Bank
Alaska USA Federal Credit Union
AUMC Mortgage Company
Denali State Bank
Federal National Mortgage Association (Fannie Mae)
First Bank of Ketchikan
First National Bank of Alaska
GMAC
Homestate Mortgage
Mt. McKinley Mutual Savings Bank
Residential Mortgage
Rural Development (formerly USDA Farmers Home Administration)
Tlingit-Haida Regional Housing Authority
Vista Mortgage
Wells Fargo Home Mortgage

The list includes the major government and private providers of mortgage funds in Alaska as well as the names of subsidiary companies for which data have been reported by the parent company. Some of the participants are primary mortgage lenders. That means they originate loans to keep in their own portfolios or sell them to participants in the secondary mortgage market. Institutions such as Alaska Housing Finance and Federal National Mortgage Association (Fannie Mae) operate in the secondary mortgage market, purchasing mortgages originated by primary lenders.

Alaska Housing Market Scorecard

2nd Half 2005

Alaska Housing Market Scorecard

1st & 2nd Quarter, 2006

Mortgage Interest

Rates
30-year Fixed
6.36%

Average rates in Alaska for 30-year fixed rate mortgages rose sharply from one year ago to reach levels not seen since early 2002.

Number of Loans

Single-family & Condominium
5,890

The reported number of single-family and condo was on par with year ago levels

Sales Price Appreciation

Single-family residence
9.2%

Sales prices for single-family homes rose from year-ago levels.

Alaska Affordability Index

1.59

Housing became less affordable from one year ago due to continued increases in sales prices and interest rates.

Lowest 
Highest     

The score for the current quarter is based on the ratio of the current value to the historical value for the data set.

SECTION ONE

Results of the Survey of Alaska Lenders

The Survey of Alaska Lenders summarizes total loan activity reported by participating lenders. These lenders include the major government and private providers of mortgage funds in Alaska as well as subsidiary companies for which the parent company reported data. In the first half of 2006, lenders representing approximately 92% of the total loan volume participated in the survey. Changes in loan activity over time may be affected not only by changes in the market but also by changes in the list of lenders participating.

Some of the participants in the survey are *primary* mortgage lenders. Primary mortgage lenders originate loans to keep in their own portfolios or sell them to participants in the secondary mortgage market. Institutions such as Alaska Housing Finance Corporation and Federal National Mortgage Association (Fannie Mae) operate in the *secondary* mortgage market, purchasing mortgages originated by primary lenders. Secondary mortgage activity is an important source of liquidity for primary mortgage lending. Although primary lenders and secondary purchasers differ, both provide financing for Alaskans to purchase housing. For the purposes of this report, maintaining the distinction is not particularly important. Therefore, references to “lenders” include both primary lenders and some secondary purchasers. Unless the difference is critical to the discussion, no distinctions are made.

Overall Loan Activity

Based on results of the Quarterly Survey of Lending Activity, the amount of lending activity and increases in average selling prices appear to signal continued strength in the residential housing market during the first half of 2006. A majority of surveyed areas percentage gains in both average sales prices and average loan amounts compared to last year, while total dollar volume of loans also increased. Interest rates reported by lenders during the first half of 2006 were generally low compared to historical averages; however they have risen over the past several quarters to levels not seen since early 2002. The trend of rising interest rates coupled with record high average sales prices have brought housing to its least affordable level in more than a decade. If housing continues to become less affordable due to rising sales prices and interest rates, individuals earning average wages may be priced out of some markets. This could in turn lead to a cooling effect on residential housing in certain areas of Alaska.

- During the first half of 2006, the statewide average sales price for all building types rose 11 percent from one year ago to reach \$263,825.
- The total reported dollar volume of loans for all surveyed building types in the first half of 2006 increased nine percent from the previous year to exceed \$1.2 billion.
- Statewide, the average loan amount for all building types during the first half of 2006 was \$207,392, up ten percent from one year ago.

- In the first half of 2006, 59 percent of the total loan dollar volume was reported in the Anchorage area. Mat-Su and Fairbanks followed with 15 and 9 percent respectively.
- The highest average sales price for all building types during the first half of 2006 was reported in Juneau at \$301,970. Prices in Juneau rose 14 percent from one year ago.
- Anchorage followed Juneau with the second highest average sales price for all building types at \$286,557. The average sales price in Anchorage rose 12 percent during the year.
- Ketchikan reported the lowest average sales price for all building types combined during the first half of 2006 at \$189,632. The average price in Ketchikan fell 19 percent from year ago levels, however the sharp drop in the average sales price can be explained primarily by a lack of larger multi-family projects reported during the year.
- Kenai had the second lowest average sales price for all building types next to Ketchikan during the first half of 2006 at \$215,623. The average sales price in Kenai rose five percent from one year ago.

Single-family homes

- During the first half of 2006, loans for single-family homes accounted for 78 percent of the total reported dollar volume of loans.
- The total reported dollar volume of loans for single-family homes increased by five percent over year-ago levels to reach a record \$972 million.
- Statewide, the average sales price for single-family homes during the first half of 2006 was \$265,043, up nine percent from the previous year.
- For single-family homes in the first half of 2006, Juneau reported the highest average sales price at \$302,918. Anchorage followed Juneau with the second highest average sales price at \$302,543.
- Average sales prices for single-family homes in Juneau and Anchorage rose by seven percent and nine percent respectively during the first half of 2006.
- Juneau and Anchorage were the only two surveyed areas to see average sales prices in excess of \$300,000 during the first half of 2006.
- The largest year over year percent increase in average sales price during the first half of 2006 occurred in Fairbanks. The average sales price for a single family home rose 17 percent to reach \$229,959.
- The lowest average sales price for a single-family home in the first half of 2006 was reported in Ketchikan at \$198,283, down nine percent from year ago levels.
- Kenai followed Ketchikan with the second lowest average sales price for single –family homes during the first half of 2006 at \$213,564, up 12 percent from one year ago.
- The average sales price for a single-family home in Mat-Su rose five percent during the first half of 2006 while the total reported dollar volume of single-family loans grew by nearly 30 percent.

Condominiums

- Statewide, the total dollar volume of loans for condominiums grew by \$18 million in the first half of 2006, an 11 percent increase from one year ago.
- Ninety percent of the total dollar volume of loans for condominiums was reported in the Anchorage area during the first half of 2006.
- The statewide average sales price for a condominium fell two percent during the first half of 2006 to \$184,790. The statewide average sales price of a condo was 43 percent less than the average sales price of a single-family home.
- The statewide average loan amount for a condominium was \$154,000 in the first half of 2006, down two percent from the first half of 2005.
- The average loan-to-value ratio for a condominium rose to 83.3% during the first half of 2006; up slightly from the year ago average of 83.0% in 2005.
- Ketchikan and Juneau saw increases of 14 percent and five percent respectively in average sales prices of condominiums during the first half of 2006, while at the same time, most other surveyed areas saw average prices decline from year ago levels.
- Among areas that saw declines in average sales prices for condominiums during the first half of 2006, Mat-Su and Fairbanks led the list. Average prices for condominiums in Mat-Su and Fairbanks fell 18 and 14 percent respectively from year-ago levels. It should be noted however that the total dollar volume of loans reported in Mat-Su and Fairbanks was small relative to the statewide total. These two areas combined accounted for four percent of the total dollar volume of loans for condos in the first half of 2006.
- Anchorage, which reported 90 percent of the total condo dollar volume, saw the average sales price for a condo drop by one percent during the year to \$187,617.

Mortgage Interest Rates

- In the first half of 2006, lenders reported a weighted average interest rate of 6.36% for 30 year conventional fixed rate mortgages, up from 5.77% one year ago.
- AHFC offered loan products with substantially lower interest rates than other lenders during the first half of 2006. AHFC's average interest rates for 30-year conventional fixed rate mortgages were 5.74%; all other lenders collectively averaged 6.48%.
- Interest rates differed between the AFHC urban and rural loan portfolios. Interest rates in the urban portfolio averaged 5.80%, while rural loans averaged less at 5.56%.
- At the most recent meeting of the Federal Reserve Board (Sept 20, 2006), policy makers maintained the Federal funds rate at 5.25% for the second consecutive time. Prior to August of 2006, the Federal Reserve had raised the Federal funds rate 17 consecutive times in order to curb inflation. Policy makers cited possible signs of a slowing economy in their decision to maintain interest rates at the current level.
- On the national front, interest rates rose from year-ago levels. Thirty-year conventional fixed rate mortgages averaged 6.51% in the first half of 2006, compared to 5.80% one year ago. At 6.51%, interest rates are at their highest level since the first half of 2002 where they averaged 6.84%.

New vs. Existing Construction

In the Survey of Alaska's Lenders, new homes are any residential housing constructed within 12 months of the survey date. Any loans that do not fit in the new construction category are classified as existing construction.

- The total dollar volume of loans for new construction reported during the first half of 2006 rose 38 percent from one year ago.
- For existing construction, the total dollar volume of loans reported during the first half of 2006 rose less than one percent from one year ago.
- During the first half of 2006, 28 percent of the total dollar volume of loans went toward new construction. The percentage of total loan volume going toward new construction increased from 22 percent one year ago.
- When considering all building types combined, the statewide average sales price for new construction during the first half of 2006 was \$312,292, 20 percent higher than year-ago levels.
- For all building types statewide, the average sales price for new construction was 26 percent higher than existing construction during the first half of 2006.
- The average sales price for existing construction during the first half of 2006 was \$247,449, down five percent from one year ago.
- For all building types, the Mat-Su area had the highest percentage of new construction in terms of loan dollar volume. During the first half of 2006, 43 percent of the loans reported in Mat-Su went toward new construction.
- The average sales price for new construction in Mat-Su rose by three percent during the first half of 2006 to reach \$254,351. The average sales price for existing construction in Mat-Su rose one percent during the same time period.
- During the first half of 2006, Ketchikan and Kodiak had the lowest percentage of loans (in terms of dollar volume) for new construction with seven and 20 percent respectively.
- Homebuyers borrowed a higher percentage of the purchase price for existing construction during the first half of 2006. Loan-to-value ratios for existing construction were 80.5% compared to 74.3% for new construction.

Employment and Wages

- The average unemployment rate in Alaska during the first half of 2006 was 7.4%, up slightly from the 7.3% average rate in 2005.
- The average total labor force in Alaska during the first half of 2006 was 342,154, up from 336,442 one year ago.
- Statewide, average monthly wages increased by 4.2% during the first half of 2006 to reach \$3,396 per month.

- The highest average monthly wage for the first half of 2006 in Alaska was reported in the North Slope Borough at \$6,111 per month.
- The Wade-Hampton Census Area reported the lowest monthly wages at \$1,654 during the first half of 2006.
- During the first half of 2006, Anchorage, Fairbanks, and Juneau saw increases in average monthly wages of 3.2%, 5.7%, and 7.5% respectively.
- Juneau, which reported the highest average selling price for a single-family home in the first half of 2006, had average wages of \$3,241, five percent lower than the statewide average of \$3,396.
- Ketchikan, which reported the lowest average sales price for a single-family home during the first half of 2006, had average wages of \$2,954, 15 percent lower than the statewide average.

Alaska Affordability

The Alaska Affordability Index is a measure of the number of wage earners necessary to afford an average home. The index value indicates the number of earners per residence receiving the average wage that are necessary to qualify for a 30-year single-family home mortgage at the average interest rate with a 15% down payment. An increase in this index means that a family is less able to afford a home.

- According to the Alaska Affordability Index, housing became less affordable across Alaska during the first half of 2006 due to rising interest rates and home sales prices.
- Statewide, the Alaska Affordability Index for single-family housing reached 1.59 during the first half of 2006, up from 1.44 one year ago. This is the highest level the index has seen since it was first tracked in 1992, which would indicate that housing is at its least affordable level.
- For single-family housing, Bethel and Mat-Su led the list of least affordable areas during the first half of 2006 with index values of 2.08 and 1.87 respectively. Juneau followed Mat-Su at 1.79.
- Ketchikan and Kenai had index values of 1.43 and 1.45 respectively, making them the two most affordable areas for single-family homes in the first half of 2006.
- The Affordability Index value for Anchorage single-family homes rose to reach 1.64 during the first half of 2006, up from 1.49 in 2005.
- People working in Anchorage and owning a residence in the Mat-Su area experience a more affordable housing situation. The Index value for a household earning an Anchorage wage while residing in Mat-Su was 1.38. The Index value for a Mat-Su home with Anchorage wages increased from 1.22 in 2005.
- Average wages in Anchorage were 35 percent higher than those in Mat-Su during the first half of 2006. At the same time, average sales prices of single-family homes were 36 percent higher in Anchorage than Mat-Su.

- Condominiums were more affordable than single-family homes during the first half of 2006 and unchanged from 2005 with an index value of 1.18.

National Affordability

This index is compiled by the National Association of Realtors and is interpreted differently than the Alaska Affordability Index. A value of 100 means that a family earning the median income has exactly enough income to qualify for a mortgage loan on a median-priced home, assuming a 20% down payment. A decrease in this index shows that a family is less able to afford a home.

- Nationally, housing became far less affordable than one year ago. The National Affordability Index fell to 109.0 during the first half of 2006, down sharply from 127.1 in 2005.
- Median household income grew by one percent during the first half of 2006, however rising mortgage rates and increases in the median price of a single-family home weighed on affordability.
- According to the National Affordability Index, median sales prices for single-family homes rose six percent in the first half of 2006 to reach a record high of \$222,717.
- National average interest rates increased from 5.80% in the first half of 2005 to 6.51% in the first half of 2006. Despite this increase, interest rates continue to remain low relative to historical averages and have been well below six percent since 2002.

Notes:

- Based on the quarterly Survey of Lender's Activity, a survey of private and public mortgage lenders.
- Refinanced mortgages are excluded from this data series. Historical series revised 2nd quarter of 1999 to exclude refinances from Fannie Mae and AHFC data.
- Fannie Mae data excluding refinances were not available for the 1st, 2nd & 3rd quarters of 1992 and the 1st quarter of 1993.
- AHFC data for the 1st and 2nd quarters of 1992 were not revised. AHFC assumed rural loans from DCRA in the 3rd quarter of 1992.
- AHFC's urban portfolio for 2nd quarter 1992 did not include any refinances. Original data from the 1st quarter 1992 lender survey was not available for comparison.
- Beginning 2nd quarter 1999, Fannie Mae data are included in both the single-family and condominium categories as appropriate.
- Previously, all Fannie Mae data were recorded as single family.
- Beginning 2nd quarter 1999, an adjustment is made to reduce double counting of loans reported by both primary and secondary lenders.
- Comparisons with earlier quarters will under- or over-state differences in activity.
