Main Points

- A total of 138 surveys were mailed to homeless agencies and housing providers. Sixty-five (47%) of the surveys were returned.
- Seventy-seven percent of Anchorage providers returned their survey compared to 39% for all other areas of the state.
- Compared to the Summer 2001 survey, Anchorage (137) and Fairbanks (105) reported the largest increase in the homeless.
- Homeless providers in general have reported an upward increase in the number of homeless they serve (229 individuals and families).
- The percentage of families represented among the homeless also continues to grow (2%). Providers, particularly in Anchorage, have echoed this finding. They have reported an increase in the number of families they serve who are homeless, doubled up, or in need of financial assistance.
- Given the current upward trend in utility costs and rents, the number of homeless families is expected to increase. Some providers have stated that many Welfare-to-Work families are now hitting nearing the end of their assistance and that their representation among the homeless will probably increase.
- Very few changes were reported in the ethnic/racial composition of the homeless. The majority remain white or Alaska Native/American Indian.
- The percentage of homeless with mental illness has increased. The Community Mental Health Center in Anchorage has reported that they are seeing an increase in the number of mentally-ill with complex problems such as substance abuse, physical abuse, and emotional trauma. An examination of the Summer 2002 homeless data indicate that well over half of the homeless with mental illness also have a physical disability and 25% have a substance abuse problem. Providers have linked these numbers to a growing shortage of resources that can adequately address the needs of this special population.

132	147	213	186	186	191	153	361	411	1,569

Notes:

1. Refers to the change due to participation caused by: 1) An agency participating in last seasonal survey, but not current survey or 2) Change due to an agency not participating in last seasonal survey, but participating in current survey

2. Cases for which demographic variable is unknown, excluded from percentage calculations.

3. Refers to cases lost due to an agency participating in last seasonal survey, but not current survey

4. Refers to cases gained due to an agency not participating in last seasonal survey, but participating in current survey

5. Refers to the total sum of household size, may overestimate homeless because homeless members of a household may be counted more than once.

Without individual demographic data on each household member, duplicates cannot be ruled out.

Notes:

- Refers to the change due to participation caused by: 1) An agency participating in last seasonal survey, but not current survey or 2) Change due to an agency not participating in last seasonal survey, but participating in current survey
- Cases for which demographic variable is unknown, excluded from percentage calculations.
- Refers to cases lost due to an agency participating in last seasonal survey, but not current survey
- Refers to cases gained due to an agency not participating in last seasonal survey, but participating in current survey
- Refers to the total sum of household size, may overestimate homeless because homeless members of a household may be counted more than once. Without individual demographic data on each household member, duplicates cannot be ruled out.
- Percentages are calculated from moving averages

- Notes:**
- Refers to the change due to participation caused by: 1) An agency participating in last seasonal survey, but not current survey or 2) Change due to an agency not participating in last seasonal survey, but participating in current survey
 - Cases for which demographic variable is unknown, excluded from percentage calculations.
 - Refers to cases lost due to an agency participating in last seasonal survey, but not current survey
 - Refers to cases gained due to an agency not participating in last seasonal survey, but participating in current survey
 - Refers to the total sum of household size, may overestimate homeless because homeless members of a household may be counted more than once. Without individual demographic data on each household member, duplicates cannot be ruled out.

Notes:

1. Refers to the change due to participation caused by: 1) An agency participating in last seasonal survey, but not current survey or 2) Change due to an agency not participating in last seasonal survey, but participating in current survey
2. Cases for which demographic variable is unknown, excluded from percentage calculations.
3. Refers to cases lost due to an agency participating in last seasonal survey, but not current survey
4. Refers to cases gained due to an agency not participating in last seasonal survey, but participating in current survey
5. Refers to the total sum of household size, may overestimate homeless because homeless members of a household may be counted more than once.
Without individual demographic data on each household member, duplicates cannot be ruled out.
