Alaska Juneau Gold Mining Company

Alaska Juneau Gold Mining Company Records, 1880-2000

MS 999

1500 linear ft.
750 cu. ft. [map cases]

Prepared by: Gladi Kulp Oct. 2000
Revised by: Alea Oien Aug. 2008

Acquisition: The collection was donated by Alaska Electric Light and Power Company in 1999 (Accession no. 99-61). The donation was facilitated by David Stone, who also inventoried the collection before the transfer. The A.J. properties, including company records, were eventually purchased by Alaska Electric Light and Power Company. AELP archived the records until they were transferred to the Alaska State Library in the summer of 2000.

One series, Frederick Worthen Bradley, came from the Bradley family and was added to the collection as a separate series. Also included in this collection is Accession 1988-47, transferred from the Elmer E. Rasmuson Library, and Accession 2006-18 donated by John Delgado.

The Alaska Coastal Management Plan Coastal Consistency Review Packet, in the Echo Bay subseries, was donated by Jonathan "Skip" Gray. Accession 2010-031.

Access: Most of the collection is unrestricted, some parts of the collection are restricted until 2025.

Copyright: Request for permission to publish material from the collection must be discussed with the Librarian. Photocopying does not constitute permission to publish.

Processing: The records were arranged in series by the various mines that Alaska Juneau eventually bought. These mines include Alaska Gastineau (Perseverance), Alaska Treadwell, Ebner, Silverbow (Nowell), Kensington, and Echo Bay. Various other smaller mining operations also gradually funneled into A.J. Subseries are records that emanated from the various offices and include such topics as correspondence, employee records, accident reports, and annual reports. Records are described at the folder level. Accession 2006-23 added 5/2009; Accession 2002-38 added on 6/2/2009 (AG45).

The extensive collection of maps and drawings was re-housed in steel map cases.

History of the Organization

The history of the Alaska Juneau Gold Mining Company (A.J.) begins indirectly with the discovery of gold at Sumdum and Windham Bay in 1870. This was followed by discoveries in Silver Bow Basin in 1880 by Richard Harris and Joe Juneau. In 1881 John Treadwell, staked by a San Francisco company purchased the Paris claim on Douglas Island for \$400. He set up a five-stamp test mill. In 1883 the company set up a 120-stamp mill, then a wharf and chlorination plant. The mill was operating at full capacity milling 300 tons of ore by the summer of 1885. In 1889 John Treadwell sold his interests to the Alaska Treadwell Gold Mining Company.

In early 1897 the Alaska Juneau Gold Mining Company was incorporated under the laws of West Virginia. The company purchased 23 patented claims in the Silver Bow Basin between Perseverance and Ebner mines for lode mining low grade gold ore. In 1900 Frederick W. Bradley purchased a major interest in A.J. holdings. At this time Bradley was mining engineer and president of the Bunker Hill and Sullivan silver-lead mine in Idaho. He became president of A.J. and president and consulting engineer of the Treadwell mines group. Robert A. Kinzie was resident engineer for both mines until Philip R. Bradley, brother of F.W. Bradley, became resident manager from 1914-1920 and later, consulting engineer.

The A.J. and Treadwell were considered together because of stockholding interests and integrated management. The corporate office for both mines was in the Mills Building in San Francisco as was the Alaska Gastineau. Offices and records were physically located at Treadwell until 1922 when the Ready Bullion mine closed. At this time the offices and records moved across the Gastineau Channel to the site of the A.J. operations located in a blue metal building next to the steam plant.

Eventually, the operations of Alaska Gastineau (Perseverance) and A.J. mines were producing more than Treadwell. By 1916 the Alaska Gastineau mill was crushing 12,000 tons of ore each day. The 1917 cave-in slowed down Treadwell production although the Ready Bullion mine still operated until 1922. In spite of the Treadwell closing, by 1928 Juneau was the richest gold-producing location in the world. A few decades later, in 1944, the A.J. closed as a result of the World War II labor shortage which escalated production costs above gold values. So ended the glory days of Juneau's mining history.

[A more complete history can be found in *Hard Rock Gold* by David and Brenda Stone from which the above was taken.]

Scope and Contents Notes

The collection includes rather complete records from the Alaska Juneau Gold Mining Company (A.J.) which also includes mines cooperatively owned or purchased by A.J. These mines include Alaska Gastineau (Perseverance), Alaska Treadwell, Ebner, Silverbow (Nowell), Kensington, and Echo Bay. Various other smaller mining operations also gradually funneled into A.J.

The A.J. properties, including company records, were eventually purchased by Alaska Electric Light and Power Company. AELP archived the records until they were transferred to the Alaska State Library in the summer of 2000. The oldest records are from mines begun in the early 1880's such as Groundhog, Paris, Fuller, Johnson Milling & Mining, and Dora, Fuller being the first.

The collection also contains photographs and an indexed map and drawing collection.

Note on the use of this finding aid:

The finding aid can be used to search for key words or phrases. On the left hand column is listed the box numbers.

The collection is arranged by the various mines – the Alaska-Juneau or AJ; the Alaska Gastineau or AG, the Treadwell or T, the Ebner or E, the Kensington or K; and Echo Bay Mines or EB. Within each mine are numbered series.

To find an item go to the section of the MS 999 that has the mine. Then look for the box or other item. The next number will be a file to look within the box. If there is no file folder number then the file folder will be found by its file folder name.

For example – if you are looking for AJ lead concentrates you would see:

AJ2-15 J-38 Lead concentrates, 1914-1957. The mine is AJ, the series is 2, the box number is 15 and the file folder name is J-38 Lead concentrates, 1914-1957.

Another example AG9-1-2 is a historical photograph. The mine is AG, the series is 9, the file folder is 1, the photo number is 2.

Series:

AJ1 ALASKA JUNEAU GOLD MINING CO. (A-J)

Personal Files, [Desk/Office Files] of Frederick Worthen Bradley General,

Superintendent/Manager:

F.W. Bradley was a major shareholder and served as president of the Alaska Juneau Gold Mining Co. from 1900 until his death in 1933. This collection was donated to AELP by the Bradley family in 1985. It has been added to the A.J. Collection as a separate series.

Folder titles were retained as in "P.R. Bradley" for Folder 1. The box was labeled "Personal Correspondence," probably by David Stone, even though most was business-related; we retained the label and the original order.

Employee Personnel Records: There are 3 groups of employee records for the 1914-1944 AJ mine operation. No records have been located pre-1914. The records are labeled “transfer” because they were no longer needed in the main office file so were transferred to storage.

Transfer Employment Statements

These records are listed in alphabetical order; if there is more than one statement per employee, the most recent is in front. The Statement of Employee includes similar information to the Certificate of Employment but also includes names, ages, and addresses of children. The period covered is 1927-1941 and includes 4 boxes.

AJ3-1	Transfer Employment Statements Box 1	Aalto, August - Guzman, Eucebio
AJ3-2	Transfer Employment Statements Box 2	Haapenen, John - Myre, Fred Louis
AJ3-3	Transfer Employment Statements Box 3	Nabalis, Louis - Zuskoff, George

Employment records transfer

These records on 4 x 6 cards are arranged alphabetically by last name of employee; there are also a few 3 x 5 cards. The record includes: employee

name, social security number, date employed, department (job description), date left, and reason. The 12 boxes of records span the period from 1914-1966 with the bulk from 1914-1944.

A-J Certificates of Employment

The records from 1916-1926 are arranged alphabetically. Each Certificate of Employment contains information about the employee including: name, birthplace, age, marital status, name and address of parents, and addresses of children, job title, previous employment and job titles, membership in fraternal and labor organizations, and residence. These records include both A-J and Treadwell employees.

Series:

TREADWELL MINES, Douglas Island, Alaska

Alaska Treadwell Gold Mining Company

This group of mines is often referred to as the Douglas Island mines. It includes the Alaska Mexican, Alaska United, Ready Bullion, and 700, which made up the Treadwell Complex Mines. Records show that from 1915 the Douglas Consolidation was in effect whereby equipment, power, management, etc. were shared by the various Douglas Island mines under the management of P.R. Bradley, Treadwell manager.

General Superintendent

Correspondence: P.R. Bradley reported to F.W. Bradley, his brother in the San Francisco corporate office. The Treadwell office labeled these files the Douglas Island files, which include correspondence and reports from the above-mentioned mining entities. Files 141 and 141a includes P.R. Bradley's weekly letter and his personal files. Family matters are documented such as issues pertaining to the Bradley children's education. The letter D added to some files was supplied by David Stone to signify Douglas Island files.
