HISTORICAL NOTE

Auke Bay Laboratory is a part of the Alaska Fisheries Science Center, and a branch of the federal agency, NOAA (National Oceanic and Atmospheric Administration’s National Marine Fisheries Service), responsible for research on living marine resources in the coastal oceans off Alaska and off parts of the west coast of the United States. With a staff of 400, their region covers nearly 3 million square miles including the North Pacific Ocean and the eastern Bering Sea. SCOPE AND CONTENTS NOTE

The Auke Bay Laboratory collection, *Fisheries & Wildlife Research in Alaska, 1920s-1980s*, is a valuable graphic history of the research done by the Auke Bay Laboratory and the earlier Fish and Wildlife Service in the state of Alaska. The collection of approximately 25,000 slides and 7,000 photographs features images from all over Alaska and a few from Seattle and Canada from the 1920s to the 1980s (bulk, 1950s to 1960s.)

Subjects cover a wide range of topics mostly related to fisheries and include Eskimos from the Alaska Peninsula, fish traps and trap keepers from Southeastern Alaska, Bureau of Fisheries fish camps, the 1964 Earthquake in Anchorage, fish canneries and hatcheries many of which no longer exist, totem poles from SE Alaska, fishing vessels, research vessels and aircraft, pioneer aviator Robert Baker, the Alyeska pipe yard at Valdez, wildlife, a wide variety of fish, shellfish, marine mammals and invertebrates, F&WS and Auke Bay Laboratory personnel and early Alaskan pioneers to name a few.
