HISTORICAL NOTE

The first Alaskan Aerial Survey Expedition was conducted between June 6 and September 24, 1926, headed by Lieutenant Ben H. Wyatt of NAS San Diego. The preparations for the expedition were largely made at San Diego, although the staging area was Seattle. The expedition, under command of Lieutenant B. H. Wyatt, was composed of the tender Gannet (AM 41) the barge YF 88 housing a photo lab and mobile base for the expedition, and three Loening amphibians. Two of the airplanes were OL-4s equipped for aerial photography. The third was an OL-2 which served as a standby plane for searching in case one of the photography planes was forced down. It was also the radio plane for the expedition. The work of the expedition, which extended through the summer and into September, was performed in cooperation with the Department of the Interior for early aerial mapping of Alaska. The purpose of the expedition was to survey Southeast Alaska for the Department of the Interior for use with the investigation of resources of that region. During the summer over 15,000 square miles were mapped. While Wyatt was commander in charge of this particular outing the entire Alaskan Survey (which began in 1926 and was finally completed in 1929) was under the command of Lieutenant Commander A. H. Radford (later Rear Admiral – whose distinguished naval career cumulated in service as Chairman of the Joints Chiefs of Staff).

SCOPE AND CONTENTS NOTE

This particular album appears to have been presented to Lt. Ben Wyatt. Midway through the album there is a photograph of a drawing of Wyatt and there is another photograph of Wyatt standing with Alaska Governor Parks. This original photo album details the expedition’s incredible photography, truly capturing the pioneer feel. The album includes citizens on fishing trips with crew members, always an armed guard present in the event of bears, glaciers, vast pristine forests, totem poles, entire crew photos, villages, aircraft mishap, photographers and their gear, aerial photography of early Juneau, Ketchikan, loading the planes in Seattle, and views from the aircraft of other aircraft.
